The New Orthophonic Victor

WHAT IS IT—The greatest contribution to music since the development of the first Victor talking machine. It is a new instrument, new in principle, in construction, in design and new in music results.

WHAT IT DOES—It establishes new standards in the reproduction of music in these respects:

The bass in true relation to all the higher tones.
Volume is greatly increased without shrillness.
Piano notes are maintained for their true duration.
Organ music has organ resonance.
The rhythm of dance music is accented properly.
There is clarity and definition in the harmony parts.
Diction is clear and normal.
Most important of all—through a greatly increased range—all tones have their proportionate value.

These are observable characteristics, but all that may be said of the Orthophonic Victor becomes insignificant in comparison with the instrument's performance. Orthophonic Vectors are now offered to the public in a variety of designs and prices.

LOCAL ITEMS

Miss Faye Robinson left on Sunday morning for Wardlaw, where she will teach school.

Born—To Mr. and Mrs. R. D. Vanhook, of Chinook, at the Cereal Hospital on Monday, September 5, a daughter.

Leonard Bajley left on Friday for Wayne, where he will be assistant station agent.

Arle Clipsham, of Leo, Alberta, was visitor at the home of his brother-in-law and sister, Mr. and Mrs. W. Switzer on Sunday.

Joseph Sutherland, who recently arrived in Chinook from Glasgow, Scotland, has accepted a position at the Acadia Hotel.

WANTED—To purchase a good milk cow. R. Vanhook, Chinook.
Mr. and Mrs. W. A. Hurley are visitors in Saskatoon this week.

See our display of Ladies' Hats for fall and winter.—Acadia Produce Company, Chinook.

Mrs. J. S. Smith attended the wedding of her son, Bert Smith to Miss Mabel Scott which took place in Calgary on Tuesday. David Smith, the groom's brother, acted as best man.

Mr. and Mrs. C. F. Rutely, of Kindersley, and Miss B. Rutely, of Winnipeg, were guests at the home of Mr. and Mrs. W. S. Lee over the week-end.

Rev. Thos. Powell, of Calgary, Superintendent of the United Church Missions for Southern Alberta, will conduct services at the Langford School at 3 p.m., on Sunday, September 11.

Mrs. O. O'Malley accompanied her daughter, Francis to Red Deer on Saturday, where Francis will attend school.

Leonard Cooley motored to Carstairs on Sunday, returning Tuesday. He was accompanied on the return journey by his wife and baby who have been spending a holiday there.

Mr. and Mrs. E. E. Jacques entertained over the week-end their brother and sister, Mr. and Mrs. N. A. Jacques, of Calgary, and Mr. and Mrs. J. M. Brown also from Calgary.

Tom King, of Cereal, purchased a new Ford Touring car on Saturday from Cooley Bros.

John Spreeman, of Toronto, arrived in Chinook on Saturday and is visiting his brother, A. Spreeman, of Coliholme.

Miss Norma Hurley left on Sunday for Saskatoon, where she will attend school.

Miss Alice Deman, who has been spending a few days visiting at the parental home, returned to Drumheller this morning.

The regular meeting of the Chinook Ladies Aid will be held at the home of Mrs. J. Rennie on Wednesday afternoon, September 14. Everybody welcome.

Combine Cut Wheat First To Chinook Elevator

The first wheat of this year's crop was delivered to the Western Canada Flour Mills elevator at Chinook on Tuesday, when Joe Massey, who farms about seven miles south-west of town, delivered two loads of wheat from an 85-acre field. The wheat averaged over 42 bushels to the acre and graded No. 1.

Mr. Massey, who has 370 acres of wheat which is all a good stand, is harvesting his crop with a Massey-Harris combine. Quite a number of people were out to Mr. Massey's farm to see this new labor saving piece of farm machinery at work. This combined reaper-thresher is pulled by ten horses, while a gasoline motor operates the threshing machine. It is operated by two men, one driving the horses while the other looks after the machinery operating the thresher. Two men are needed to drive the wagons to haul away the grain from the machine. It certainly is a great sight to see the wheat cut down and threshed in one operation. By cutting with a combine it does away with binding and stooking which must cut down considerably the cost of harvesting a crop.

Pupils at Rearville School Win Medals

Hilda Wilton, Grade VII, and Alex Crawshaw, Grade VIII, both of the Rearville School were the successful winners of bronze medals awarded in the Diamond Jubilee History Contest held in June last.

Rain Stops Harvesting

Harvesting in the Chinook district has been in full swing until Tuesday night when rain put a stop to all harvest operations.

Cutting of wheat is practically all done in the Kimmundy district, and according to reports L. S. Youngren is getting ready to start threshing at the end of the present week.

In the Rearville district cutting of wheat is well advanced, and if the weather had remained fine most of the crop would have been in stook by the end of this week.

Caterpillars Destroy Clover Crop

N. D. Stewart, of Coliholme, has had destroyed a nice field of clover by caterpillars. Mr. Stewart had about eighty acres of clover which stood nearly eight feet high, but last week it was practically eaten off by these pests.

The ladies card club met at the home of Mrs. Harry Smith on Tuesday evening. The first prize was won by Mrs. Todd. The members will meet next Tuesday evening at the home of Mrs. Todd.

Mrs. Deman's home was the scene of a surprise party on Wednesday evening when a number of friends gathered there to celebrate her birthday.

Opportunities For Britain In Canada

Great Britain has a problem and Canada has a problem, one being the exact opposite of the other. In the British Isles there is a surplus population for which employment cannot be found. In Canada there are enormous resources and vast areas of fertile lands which call for increased population in order that development may take place. The Old Land has too many people; this New Land has too few.

Looking at the face of things it would seem to be a comparatively simple matter for the British and Canadian Governments to evolve policies under which the surplus population of Great Britain could be transferred to the open spaces of Canada, thus solving the problems of both countries. But the solution is not so easy, in fact, it is most complex and difficult.

The class of settlers which Canada wants is the agricultural type, men and women who will go on the land. True, they may not have had actual farming experience but to be welcomed and to succeed, they must be of that class which is likely to make good on the land.

Great Britain, however, has no large surplus of this type, if, indeed, any surplus at all. The British surplus population is found among the workmen, artisan and labor class, men and women who, because they cannot obtain steady employment, are obliged to accept the Government dole. Opportunities for the employment of any large number of these people in Canadian industry are small, and it would be most unfair to them to encourage their immigration to Canada where their presence would have an injurious effect on Canadian workmen and labor and lead to the creation of a Canadian situation not unlike the present one in Great Britain.

The efforts of both the British and Canadian Governments are, therefore, confined to the training of a limited number of immigrants for agricultural pursuits and the proper placing of them on farms in Canada. Welcome as these efforts are, their effect on the respective British and Canadian problems of surplus and insufficient population is almost negligible.

There would seem to be a greater hope of making an effective contribution towards the solution of this joint problem in the adoption of the idea which has been urged of late, namely, that the great capitalists in British industry establish branch plants in Canada in order to enable them to successfully compete in the growing Canadian market with their United States rivals and that they staff these branch plants with their own workmen from the British Isles.

The general adoption of such a policy would result in profitable investment of British capital, would lead to a marked development of the natural resources of this Dominion, would help to adjust the balance of trade as between Canada and the United States, would add to the population of the Dominion profitably employed, would ease the unemployment situation in the Old Land, and would increase the productive capacity, the prosperity and wealth of the Empire as a whole.

It will be frankly admitted that the industrial leaders of Great Britain have had to face enormous difficulties during and since the war. The have borne, an are still bearing, heavy burdens. They may justly feel that the present is not the time to launch out on new and untried ventures. The situation is, however, that only through the adoption of heroic measures will conditions in the Old Land be bettered, and some relief brought to British industry. Furthermore, under existing conditions, British industries are losing out in the Canadian market. An effort should be made to hold and strengthen their position here before it is too late.

It is gratifying to note that one big British concern has decided on a great undertaking in the Province of Quebec, an announcement has just been made that British financial interests controlling tens of millions of capital have finally concluded arrangements for the utilization of Southern Saskatchewan lignite coal in the carbolic and briquetting of this fuel on a large commercial scale and will within the next few months invest hundreds of thousands of dollars in the enterprise.

Premier Brownlee of Alberta and Hon. C. A. Dunning have both been urging the adoption of this branch factory policy upon the British manufacturer, and it is to be hoped that so astute a business man as Premier Stanley Baldwin himself a big manufacturer, will see the advantages to Britain, to Canada, to the Empire, of such a policy, and urge its adoption upon his fellow manufacturers in the British Isles.

Would Help Aviators

Towns Should Show Their Name Readable From Air

British aviation authorities say the time has come for English towns to erect big signs with the names of the towns visible to casual aviators who hop the Atlantic with the simplest of navigation instruments and big scale maps.

The request of Edward F. Schell and William S. Brock, in the *Pride of Detroit*, that the inhabitants of the Isle South coast resort of Heston spell out the name of this branch factory policy upon the British manufacturer, and it is to be hoped that so astute a business man as Premier Stanley Baldwin himself a big manufacturer, will see the advantages to Britain, to Canada, to the Empire, of such a policy, and urge its adoption upon his fellow manufacturers in the British Isles.

Minard's Liniment relieves backache

Manitoba's Minerals

Current activities in the mineral-bearing areas in southeastern and northwestern Manitoba have shown that the province will soon become a steady producer of gold and possibly an important source of copper and zinc.

Says Pre-War Days

Will Never Return

Russian Prince Hints German Monarchy Is Gone Forever

"History does not repeat itself. Time knows no backward movement. Nineteen hundred and fourteen and the years before will not come back."

So Prince William of Prussia, eldest son of the former German Crown Prince, declared in conversation with a woman friend of his mother at Oats Castle in Silesia.

While she avoided analyzing the meaning of William's utterances it is generally agreed that what the most popular candidate of the German Royalists for the Imperial throne implied was that there could be no restoration of the German monarchy as it existed before the war.

The scales used in weighing diamonds are so delicately poised that the weight of a single eyelash will turn the balance.

With a total population of about 100, Leavenworth, a village in Suffolk has eighty bachelors.

Disfiguring Blemishes Healed by Cuticura

Daily use of Cuticura Soap, assisted by Cuticura Ointment when required, not only soothes and heals unsightly and annoying blemishes and irritations on neck and face, but tends to prevent such conditions. Nothing purer, more economical or more satisfactory than these fragrant emollients.

Sample each free by mail. Address Canadian Dept., "Bathurst, Ltd., Montreal." Price, Soap 25c, Ointment 25c. Cuticura Shaving Stick 25c.

Speaks Several Languages

Secretary of State for the Dominions Finest Linguist in British Cabinet

Mr. J. C. M. S. Amery, the Secretary of State for the Dominions, is unquestionably the finest linguist in the present British Cabinet. He speaks several Oriental dialects as well as European languages.

When in Salonica, Sir George Milne, or "Uncle George" as the C. in C. was invariably called, asked one of his staff officers if he understood modern Greek. The officer replied that he did not, but that he had a good handbook on Greek and also that he knew a man who was supposed to be quick in picking up languages.

So Captain Amery was sent for and presented with the handbook. "Can you get the hang of it by next week?" asked Sir George. "Oh, certainly," was the reply. "You were very confident," said Sir George. "Well, you see, I wrote it," replied Captain Amery.

On Ladies' Toes

Are Sore Corns

Quick safe relief is almost instantaneous if you put Putnam's Corn Extractor. Shoes won't pinch or hurt any more. One single drop of Putnam's stops the pain. A few applications make the corn dry up and drop off. Putnam's Corn Extractor gives satisfaction. Thousands of letters every day. Get a bottle from your druggist. Refuse a substitute for Putnam's.

Water Power Development

The present recorded water-power resources of the Dominion will permit of a turbine installation of 41,700,000 horse-power. The total hydraulic installation up to the end of 1926 throughout the Dominion was 4,556,226 horse-power or less than 11 per cent of the recorded water-power resources.

GIRLHOOD DANGERS

Come Through a Weakening Of the Blood—A Tonic Is Needed

In their early teens it is quite common for girls to outgrow their strength, and mothers should carefully watch the health of their daughters at this time. If when the strength is sapped by rapid growth, that anemia develops. The first signs may be noticed by pale, listless, languid and headaches. The face grows pale, breathlessness and palpitation become apparent, with low spirits and depression.

Neglected anemia often leads to a decline, but if you see that your daughter's blood is getting weaker, need be no cause for anxiety. The finest blood-builder ever discovered in Dr. Williams' Pink Pills will help build up your girl's health and ensure for her healthy womanhood. In proof of this, Mrs. George Justusson, Elmhurst, N.Y., says: "I think Dr. Williams' Pink Pills a wonderful medicine. My daughter, Margaret, was in such a badly run down condition that we feared she was going into a decline. Her face was pale, the least exertion would leave her breathless and she suffered from headaches. She had no appetite and lost a lot in weight. Up to the time she began giving her Dr. Williams' Pink Pills no treatment had helped her. But thanks to the use of this wonderful medicine she is again well and strong, showing no signs of the trouble that had so weakened her."

In all troubles due to weak, watery blood, Dr. Williams' Pink Pills will be found a reliable remedy. Sold by all medicine dealers or sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Good Crops Along H.B. Line

Grain fields equal to those on the prairies were seen at Mile 42, Cornerman Lake, on the Hudson's Bay Railway by J. D. Gault, superintendent of illustration stations for the Dominion experimental farm, who has returned from an inspection trip over the route. He reports that at other points, grain is coming along well except at Mile 81, where cutworms have done considerable damage to vegetables. At Mile 42 there is an excellent stand of flax and pumpkins 15 inches through.

The White Pine In Canada

The botanical range of the white pine in Canada extends from the Atlantic ocean to the province of Manitoba. It is confined to the region by south of a line running approximately from the southeast corner of Lake Winnipeg, through Lake Superior, along the border of Lake Huron, Thimbleclank, through Lake St. John to Point de Mota on the St. Lawrence and Cape Breton Island.

National Dairy Council

Mr. W. F. Stephen, secretary, announces that the annual annual meeting of the National Dairy Council of Canada will be held at Toronto, on November 21 and 22 next. A number of questions will be up for discussion of interest to dairymen and dairy manufacturers. The programme will be outlined shortly.

Drives away pain—Minard's Liniment.

Effect Will Be Far-Reaching

Saskatchewan Farmers Will Benefit Greatly By Ruling Of Railway Commissioners

By the ruling of the Board of Railway Commissioners on the equalization of grain rates, Saskatchewan will gain nearly \$2,000,000 annually, starting this year.

The figure is authentic and was proven at the hearing at the freight rates probe held this spring. Saskatchewan's counsel, W. H. McEwen, K.C., quoted it to support his argument for lower rates in the West.

Figures in opposition to Mr. McEwen's submissions to the Board were filed by counsel for the railways. From these figures Alex. McDonald, Saskatchewan's freight rate expert, showed that Saskatchewan's contention was correct and a two million dollar saving annually to this province alone would accrue in a normal year.

It was only after long and arduous argument and appeal that the West was able to secure the victory recorded. It will be recalled that when the present year opened, counsel for Alberta and Saskatchewan, who pleaded jointly, were fighting hard to get judgment on their case handed down separately in order to have the new rates apply on the 1927 crop.

An appeal to have the grain submissions heard apart from the general rates investigation was abortive when carried as far as the Governor-General-in-Council.

Counsel returned West only hoping that an early ruling would be handed down to make a saving on the 1927 crop.

The Generous Public

Patrons Of Benefit Concert Qualified To Receive Proceeds

It had been a cold and stormy winter, and there had been a long strike in the main industry of the little village. There was some suffering and a good deal of want among the poorer people. A local philanthropist arranged a public entertainment for their benefit. No admission was charged but a collection was to be taken at the close of the program.

The entertainment was a good one and it was thoroughly enjoyed by a crowded house. Then the collection was taken. When it was counted, the philanthropist citizen came to the front of the platform.

"The collection," he said, "amounts to three dollars and sixty-seven cents. The proceeds, you all understand, are for the benefit of the poor. They seem to be all here!"—Youth's Companion.

Uses 'Plane To Operate Farm

The days when the horse was depended on to conduct the rancher over his domain passed to the era of the automobile a few years ago. Now the auto gives way to the airplane. The pioneer exponent of this trend is Jack Fletcher, known as the "flying farmer," because he operates his huge wheat farm near Spokane, Wash., by air.

Japanese Like Watermelon

Flight-proof watermelons cost about 5 cents apiece in Japan and the fruit is becoming a favorite. Although out of reach of the ordinary purse in Japan, melons from Yamato and Shizuoka find ready sale in Tokyo, where almost three hundred tons have been consumed this season.

Do You Cough?

Coughs, Cuts—If I caught a severe cold and could not seem to get rid of it. It just hung to me and finally settled in my bronchial tubes causing me a lot of trouble. The cough would be more severe at night than during the day, causing sleeplessness. I finally decided I would try Dr. Pierce's Golden Medical Discovery and by the time I had taken one bottle I was entirely relieved of the bronchial trouble—my cough disappeared and I was able to work as usual. I do not think a person can take anything better for bronchial weakness or deep-seated coughs than the "Golden Medical Discovery."—Miss Mary Thugg, 170 Ontario St., Chicago, Ill.

Write Dr. Pierce, Buffalo, N. Y., for free literature.

Would Extend Air Mail Service

United States Government Looks Towards Canada As A Field For Extension

Success of the air mail in the United States has led the government at Washington to look towards Canada as a field for extension of its service. Postmaster-General H. S. New has let it be known that he would welcome applications for air mail service between such points as Minneapolis or St. Paul, Minn., and Winnipeg, Man., where there is a fairly large exchange of mail over a short distance. In fact, it is likely that preliminary steps will be taken soon to put in a trial service between these two cities but final action will not be taken until after the international air mail conference in Geneva.

It has been customary for the United States post office to await application, which usually take the form of petitions, signed by a considerable number of people before establishing new air mail routes. A guarantee of about \$15,000 worth of business on any route is generally considered reasonable to justify opening a route.

Miller's Worm Powders prove their worth. They do not cause any violent disturbances in the stomach, any pain or griping, but do their work quietly and painlessly, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and a cessation of manifestations of internal trouble.

British-Jap Naval Pact Is Reported

U.S. Informers Say Agreement Between Nations Has Been Reached

The Washington Post says that word has reached the state department officials from "trustworthy sources" that Great Britain and Japan have come to a mutually satisfactory secret understanding regarding future naval supremacy when it finally became apparent the United States would not accept the British program at the recent Geneva conference.

"The gist of the secret understanding has not been divulged, the news columns declare, that it is doubtful if much definite information on its content is available to the officials of the U.S. Government. The news paper story also says the secret understanding is being discussed behind closed doors by officials' here with a view to weighing possible consequences."

Nights of Agony come in the train of asthma. The victim cannot lie down, and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Kellogg's Asthma Remedy. It banishes the frightful conditions, clears the passages, and enables the afflicted one to sleep as soundly and restfully as a child, insist on the genuine at your nearby druggist.

King's Job Not Envious

Everything Mapped Out For Months Ahead Makes Life A Drudgery

There is no doubt that the strain of the daily life of the King and Queen, with every waking hour mapped out for months ahead, is much greater than the public realize. Every one connected with the Court comments on the splendid health and spirits which the Queen always enjoys. The King is now and then fatigued, but he is never—

There is no harm in repeating a somewhat pathetic comment of the King on his own drudgery in fulfilling as he does, so ceremoniously and good-humoredly, the truly tremendous programme laid almost daily before him. Visiting the Lord Mayor of London the other day, whose life during his year of office is, as everyone knows, a veritable slavery, the King remarked: "You have to do this for twelve months but I have been doing it for twelve years."

Predicts Explosion Of Sun

Annihilation of every living thing on earth within 128 years when the sun explodes is forecast by C. T. Elvey, of Northwestern University, Chicago, writing on exploding stars. The earth will be aware of a sun burst in eight minutes from the time of the explosion, and will be cleared of all life as soon as the gases reach here 128 years after, he says. The last star explosion was in 1925, when Nova Pictoris exploded many thousand times normal size.

Used by physicians—Minard's Liniment.

Would Arbitrate National Disputes

Plea Is Made That International Difficulties Be Settled In This Way

Addressing the inaugural session of the 25th congress of the Inter-parliamentary Union at Paris, Hon. Basile Dandaneau, government leader in the Canadian senate, expressed the hope that Great Britain, the United States and France might lead all nations nearer to obligatory arbitration of their disputes. Plans for international abolition of secret diplomacy were made by speakers.

Premier, Polanco of France told the congress the work of the conference is perfectly compatible with that of the League of Nations. He assured the delegates they would find France ready at all times to aid in the cause of peace.

Lord Trenchard, Great Britain, praised the commercial treaty recently signed by France and Germany for its provisions tending towards free trade.

President Loebe, of the German reichstag, advocated the abolition of secret diplomacy. He also urged that France withdraw all occupational troops from Germany soil this year.

Paul Doumer, president of the French senate, was elected president of the congress, at which thirty-five countries are represented.

Cop (to victim of wreck) — "Why did you try to cross the tracks? Didn't you know the 4.15 was due?" Brown — Yes, but this is the first time in years that it was on time.

Babies Cry For "Castoria"

Prepared Especially for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless substitute for Castor Oil. It is a "Fooling" drop and soothing. Contains no narcotics. Proven directions are on each package. Physicians everywhere recommend it.

The genuine bears signature of

Chas. H. Fletcher.

Candles For Fifty Years

An inspection of the Caucasian Railway storehouse at Tiflis, Georgia, has disclosed that there are in stock candles enough to supply the needs of the railway for the next fifty years. Electricity is regarded as too radical for immediate adoption.

Internally and Externally It Is Good

The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pains in the chest, colic and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

About four inches in fifteen minutes is the speed of the speediest bacteria.

If her heart is in the right place it matters not whether a woman is younger or older than she looks.

Pains in the Back

Thoroughly massaged with Minard's, backache will disappear.

ON RECEIPT OF \$1.00 I will mail you 8 oz. Box of

THE NEW BRONX REMEDY, MANUFACTURED BY THE NEW BRONX THERAPEUTIC CO., 100 N. 10TH ST., NEW YORK, N.Y. Sold by all druggists. Beware of cheap imitations. The name "The New Bronx Remedy" is prominent on the wrapper.

Newsprint Industry Expanding In Manitoba When a Second Big Paper Mill Is Mooted

The newsprint industry has long been established and rapidly expanded in all eastern provinces. It sprang up and saw similar growth in British Columbia. Now the forests of the prairie provinces are being called upon to furnish raw material for newsprint demands.

One of the most outstanding recent items of interest in the Canadian newsprint is the application before the Federal Government for a pulpwood berth on the Nelson River in Manitoba, capable of supplying a newsprint mill of 400 tons per day.

This lies contiguous to the Hudson's Bay Railway, being between the Nelson River and Lake Winnipeg, and is the second berth sought in the province of Manitoba. The Manitoba Paper Company already has obtained a berth with 6,000,000 cords of wood on the east side of Lake Winnipeg, and has built a mill at Pine Falls, with a capacity of 200 tons per day, described as the largest enterprise in the province.

A 100-ton-per-day mill, according to experts, will require a berth containing at least 8,000,000 cords of pulpwood. Power for the mill will be obtained from White Mud Falls on the Nelson River, one of the greatest power sites in the Dominion. An option on these falls, it is understood, has been secured by the financial group behind the new pulpwood application. The falls are, in fact, capable of furnishing a great deal more power than the mill will need, and this is expected to be utilized by the growing mining area north and east, and thus further Manitoba's mining development at the same time.

The founding of a second newsprint mill in Manitoba would mean a great deal to the province not only in its intrinsic but also tributary activity. A 100-ton mill would necessitate an outlay of about \$8,000,000, and the development of White Mud Falls would require considerable additional capital. The mill would find employment for two thousand men, and apparently surpass in volume of output any of Manitoba's present industrial enterprises.

This projection draws further forcible attention to the timber possessions of the Prairie Provinces, which in this respect belie their name. The lumber industry has long thrived in all three provinces and its production goes no inconsiderable way to meet domestic requirements. The newsprint industry is rapidly going to them. Manitoba is about 70 per cent. wooded, and the province has been estimated to contain 1,250,000 feet of saw timber, or 4,000,000 b.m. In the sister province of Saskatchewan the area actually timbered with merchantable trees is about 750,000 acres. The Province of Alberta is estimated to contain about 21,000,000 feet of saw timber. Altogether the Prairie Provinces contain about 8,000,000 acres of commercial timber lands, and there are in addition large resources of pulpwood upon which no really accurate estimate has been made.

Opening Of The Canadian Rockies To Motorists

Among the long-closed regions of wonder and romance into which a way has at last been found are the Canadian Rockies. Each year the door opens a little further, until now a good part of the most beautiful sections of these glorious ranges is within the motorist's reach. The opening this year of The Kicking Horse Trail, linking up Yoho National Park by motor with the outside world, marks the fulfilment of one more daring engineering conception.

Cafe Has New Ideas

There is a rambouillet cafe near Pomona, Calif., that offers a new wrinkle in entertainment. The patron who wants a fish dinner and is willing to wait for it is supplied with a pole, line and fly and allowed to catch his own in a small brook that is kept heavily stocked with hungry trout. While the fish are being prepared, he may enjoy a walk through the small farm that is operated in connection with the cafe.

Gives Autos For Charity

Daron Bying of Vimy, former Governor-General of Canada, has donated to charity three high-priced automobiles which he used while at Rideau Hall. Mayor Baillairge, of Ottawa, received official advice that these cars had been placed at his disposal to be used for charitable purposes. The cars will likely be sold and the proceeds given to charity.

Depends On Viewpoint

Average Farm Work No Harder Than City Work

"Getting back to the farm" is a present day slogan. In spite of this, most of those on the farms are steadily and regularly educating their boys and girls, who after a year or so at high school, positively refuse to return to farm work. It remains for some agriculturist with psychological training sufficient to make boys believe it is fun to load a measure of spreader on the south side of a barn on a sweltering hot day in June or July. After all, the work is not greater than that exerted in rowing a boat or paddling a canoe along the beach, where also the odor of the fish is just as sweet as that of the barnyard while the sand-flies and other flies in the vicinity are more numerous than flies round a cow stable at milking time on a warm sultry evening.

Cattle Show Is Different

No Evidence Of Showmanship At Isle Of Guernsey Ringling

The average ringling at the American cattle shows and fairs would be somewhat lost at an Isle of Guernsey ringling. In the first place, several classes are judged at the same time and the cattle from each herd do not stand together. They are tethered around the field according to the class in which they show, which makes it easier to see the cattle after the judging, but it is more difficult for the herdsmen. Furthermore the cattle come to the field, just out of pasture, without fitting or clipping, and there is no evidence of showmanship, the cattle being allowed to stand at their best as they please. The island judges place great emphasis on dairy temperament and skin secretions.

Winnipeg Newspaper Union

An Easily Fashioned Frock

Smartly simple is this chic one-piece frock having the modish two-piece effect. The skirt, having an inverted plait at each side seam, is joined to the bodice, and the round neck, belt, and long dart-fitted sleeves are effectively bound. No. 1639 is for misses and small women and is in sizes 16, 18 and 20 years. View A size 18 (36 bust) requires 2 1/2 yds. of 54-inch material; View B requires 1 1/2 yds. 35-inch material for bodice, and 1 1/2 yards for skirt. Price 29 cents the pattern.

Garnet Ranks Among Good Milling Wheat

Opinion Given In New Bulletin Issued By Expert

Garnet seems entitled to rank among the good milling wheats. This is the considered opinion of L. H. Newman, the Dominion Cerealist, as expressed in his new bulletin on "Garnet Wheat." The chief point in which Garnet may be open to a little criticism is in the color of the flour which is slightly more yellow or creamy than is that of Marquis. The unbleached flour of Garnet when freshly milled may be described as light yellow or creamy yellow, while that of Marquis may be described as creamy white. Since, however, bleaching and maturing processes have become highly developed and are becoming generally practised, the objection to the color of Garnet, if it is an objection would appear to be appreciably minimized.

Garnet seems to be about the equal of Marquis in weight per measured bushel, and where the supply of moisture is ample it may even exceed the other wheat. The two wheats are about equal in flour yield, but the ash content of Garnet is generally appreciably higher than that of Marquis. Garnet flour generally produces a little higher bread yield and a loaf of slightly greater volume than Marquis. In texture of crumb Garnet is almost equal to Marquis, and superior to Early Red Pile, Early Triumph and Kitchener. Good texture combined with high volume is commonly regarded as an indication of high baking strength.

Says Canada Finest

Place For Emigrants

Ideal For Surplus British Millions

Opinion Of Dr. Brown

In an interview at Regina, Dr. Brown, retiring president of the World's Poultry Congress, London, England, said that he had become a missionary for Canada.

"You have an amazing country," he said. "It is so diversified and so thoroughly attractive throughout its length and breadth."

Though it the choice of lands for immigration. When he arrived home, he said, he would not have the slightest hesitation in advising immigration to Canada. He pointed out that England had increased enormously in population despite the tragedy of war.

"Saskatchewan is the ideal place for our surplus millions," he concluded.

World's First Turkey Show

Dallas was selected as the most logical city in which to hold the "All the World Turkey Show" January 11 to 16, by the Southwestern Turkey Club, which met at the Adolphus Hotel, Dallas, Tex., recently. Invitations will be sent to all turkey clubs of the United States and foreign countries to participate in the first national gathering of turkey raisers ever planned.

Before books became so generally used, persons fortunate enough to possess any guarded them closely, often chaining those containing business records to their ledgers; thus they became known as "ledgers."

Great Britain Would Take Canadian Cattle

But Cannot Pay Present Price Says London Man

Great Britain wants Canadian cattle on the hoof as all other cattle markets the world over, except that of Ireland, are closed to her owing to hoof and mouth disease, but she cannot pay Canada's price as it now stands, declared Henry Ridpath, vice-president of the Canadian Chamber of Commerce, London, and special representative in Great Britain of the Pat Burns Co., Calgary, at the Royal Alexandra Hotel, Winnipeg, where he was in conference with Mr. Burns.

Great Britain's requirements in the meat line are approximately 2,000,000 tons per year, half of which she imported last year from the Argentine, Australasia and New Zealand in the form of chilled or frozen meat, Mr. Ridpath said.

Owing to the high prices in Canada which are kept up by demand from the United States, the export of live cattle to Great Britain has fallen off from 100,000 head, in 1925, to 5,000 so far this year. Not even carcasses may be brought in from the Continent, Mr. Ridpath said, so strict are the regulations.

No Market For Poor Hay

Notice States U.S. Has Prospect For Record Crop

The Canadian farmers are warned against shipping poor hay to the markets of the United States in a notice issued by the Department of Agriculture. The announcement says:

"The attention of farmers in the hay shipping sections of Canada is drawn to the warning given by the United States Department of Agriculture that shippers make certain of their market before baling and shipping any poor quality hay. The warning should be especially heeded by Canadian farmers who export to ship hay across the border.

"There is a record hay crop in prospect in the U.S. Present indications are that it will amount to 102,000,000 tons, or 16,000 tons more than last year, and 4,500,000 tons more than in the previous record year of 1921.

"Even last year, when the United States hay supply was the smallest since 1913, the arrivals at markets were fully equal to the demand. This year there will probably be sufficient good hay to fill all requirements and poor hay will find a draggy market."

Ability Is Uncanny

Bill Jenner, a sixty-two-year-old clockmaker who for the last thirty-two years has been winding and tuning the 1,050 clocks of the Savoy Hotel, London, claimed many years ago that at any hour of the day or night he could tell the time within half a minute. This uncanny ability baffles the British Medical Society, members of which have tried by numerous tests to disprove what they call his "auto psychomotor police."

The Dominion of Canada was formed in 1867. Today there are sixty-seven languages spoken in the Dominion.

Flattery consists of having your secret opinion of yourself expressed in the language of others.

Agricultural Possibilities Of Hudson Bay Railway Belt Are Now Being Determined

Live Stock Totals

More Horses In Canada In 1926 Than In Previous Years

It is interesting to note from the very comprehensive report of the Director of the Experimental Farm System of Canada for the year ending March 31st, 1927, that the rapid progress of motive power has not made any material difference during the last five years in the number of horses in the country. As a matter of fact there appears to have been more horses in Canada in 1926 than there were last year or in 1923, but in 1922 and 1924 the totals ran somewhat higher. Milk cows show an increase in 1926 over every other year, but other cattle show a decrease, the difference between 1922 and last year being no less than 765,150. Sheep show an increase in 1927 over the three preceding years, although fewer than in 1923. Swine are greater in number than in any other year excepting only 1924.

Alberta's Coal Wealth

Greater Than All Known Coal Deposits In Rest Of British Empire

Alberta's potential coal wealth is greater than all the known coal deposits in the rest of the British Empire put together, Sir Thomas Holland, chairman of the Empire mining and metallurgical council, stated at Montreal previous to sailing for home.

"If the present endeavors to change coal into fluid fuel capable of displacing petroleum and all its products are successful, the advantage of the United States in having the richest oil deposits in the world will be killed, and Canada will take the place of the United States as the world's provider of liquid fuel," Sir Thomas said.

Fry Distribution In Manitoba

The Department of Marine and Fisheries announces a distribution of over 72,000,000 white-fish fry from their hatchery at Winnipegosis, Manitoba. This is an increase of more than 21 per cent. over last year's figures. The fry were all planted out in good condition on suitable grounds in the lake over a wider area than in any previous year, some of the fry being taken as far north as Whiskey Jack Island in the northern portion of Lake Winnipegosis.

Ontario Gas and Auto License Taxes

Definite announcement was made recently by Hon. G. Howard Ferguson, premier of Ontario, to the effect that legislation providing for an increased gasoline tax and a reduced motor license tax would be brought down by the government at the next session of the Ontario legislature.

Lawyer: "I think I can get the jury to exonerate you." Florian: "Man, Ah don't care to be exonerated. Ah wants to be let loose!"

(1) Bridges and Park. (2) Central Park. (3) Riverside Park. (4) C.P.R. Gardens

A City Beautiful in the West

There is general impression when the Canadian West and the prairies are mentioned, of a country flat and open. The cities that everywhere sprang up—some of them almost overnight—in consequence of the prosperity of the West, have been designed and built with a view to beauty and the above pictures of parks in Medicine Hat, Alberta, amply bear out this claim. They represent oases of woodland shade in the middle of

a hard bare for the most part of trees they are due to the hand of a man who knows how much they are valued. It is a fine object lesson in what can be successfully done to make beauty flourish where none or little existed prior to the advent of the settler. Medicine Hat is a good example of what beauties of light and shade the cities of the Canadian West possess.

Recent decisions with respect to the completion of the Hudson Bay Railway has led to a number of statements respecting the resources of the territory through which the railway passes and of the country adjacent to it. Very little has been said, however, as to the possibilities for agriculture, but the Federal Department of Agriculture has thought sufficient of the possibilities to recently establish some experimental plots along the line of the railway. Regarding the soil conditions, a report published a couple of years ago by the Natural Resources Intelligence Service, on the general resources of the region, may be of interest in this connection.

It cannot be said, states the report, that the agricultural future of the country has been accurately determined as yet, despite the fact that success has been met in a small way. At the same time prospects are by no means discouraging. The extent of arable soils is known to be considerable; rainfall is sufficient and well timed; and summer temperatures as recorded at The Pas and Norway House are exceedingly favorable to fast growth and early maturity of field crops. As far north as Split Lake the natural flora of the well drained areas is practically identical with that of similar ground in the Riding Mountains 400 miles southwest from Split Lake. Some indication of the relative surface conditions prevailing in the belt may be obtained by examining a cross section of the country from The Pas northeast towards Nelson for approximately 250 miles as represented by an examination of lands adjoining the railway.

Type	Total Mileage	Per Cent.
Swamp soils	185	53
Boulder clay	27	8
Lake clay	105	30
Bench sand	3 1/2	1
Bedrock outcrop	28	5
Total	315 1/2	100

Soil surveys of this late, agricultural belt have not been attempted except reconnaissance examinations on a limited scale. It has been estimated that a large belt of about 20,000 square miles, the greater part of which lies between the Churchill and Nelson rivers north of mile 120 (N. B. Ry.) and of which 50 to 75 per cent is arable soil, could be made available for mixed farming. This central belt is composed of old interior lake beds whose even textured lacustrine clays have filled the valleys and transformed a broken country into one of more even and undulating topography. The clays are as much as 100 feet deep in places. The soils are all drift material excepting the swamp soils. Ordinarily there is little surface cover as distinct from the subsoil which is low in organic content. Five to twelve inches below the shallow surfacing of decayed leaves and vegetation the clay is found, brown in color from its association with the decayed matter, and quite friable. The swamp deposits on the other hand are composed for the most part of organic material consisting of layers of mosses and other vegetable matter which in the north especially shows little evidence of decomposition or alteration, due largely to the ground-water or cold ground-water which prevents oxidation. Much of the clay land is mucky covered and poorly drained, but these are difficulties which should be overcome with time and forethought and at no great expense. The rainfall is not heavy, the forest cover mostly light and the surface free from boulders, so that little difficulty should be met in draining, clearing or bringing the ground under cultivation.

Copper Deposits in Canada
Copper ores of various kinds, including the native metal are found in many places throughout Canada. Production has so far been confined to the following areas in order of their importance: British Columbia, Ontario, Quebec, Manitoba, and Yukon. Deposits of copper ores are also known in the Maritime Provinces, and in the Arctic regions of Canada. The Arctic deposits, although at present inaccessible, possibly constitute one of the great copper-ore reserves of the future.

Mount Duff
Mount Duff is situated on the International Boundary between British Columbia and Alberta, in latitude 60 degrees and longitude 123 degrees. According to the Eighteenth Report of the Geographic Board it is named after Rt. Hon. Mr. Justice Lyman Duff who was one of the counsel before the Alaskan Boundary Tribunal.

A Lady always has a greater (The Gentleman admires her) who has his shoes polished with—

"NUGGET" SHOE POLISH

There's a "Nugget" shade for every shoe made.

WORLD HAPPENINGS BRIEFLY TOLD

The first taxi cab appeared in the streets of Jerusalem recently. It cost a vast amount of curiosity.

An invitation to visit China to promote aviation has been extended to Col. Charles A. Lindbergh, New York Paris. Lindbergh said he might accept.

More and better immigration for Canada is the prospect for 1925, W. J. Egan, deputy minister of immigration, declared on his return from a European tour that lasted more than three months.

Vivian Gell, of Cleveland, has definitely resigned his cabinet post as chancellor of the Duchy of Lancaster, and will not go to Geneva for the meeting of the League of Nations Assembly.

Arthur Joseph Noel, the fourth Earl of Gainsborough, private chamberlain of Edward and George V, and former attaché at the British embassy at Washington, died Aug. 27. He was 43 years old.

The Soldiers Settlement Board, which has handled the placing of returned men on the land, will be incorporated in the Land Settlement Board in the Department of Immigration, reports Hon. Robert Porter, minister of immigration and colonization.

For having set fire to a stack of hay containing about 22 heads belonging to his employer, a young man named Mountain, a recent arrival from the Old Country, was sentenced at Winchester, Ont., to serve one year in the Guelph reformatory.

The University of Toronto, conferred its highest honor, the degree of Doctor of Laws, honoris causa, upon its Hon. Lord Bessent, of Burg, Lord Chief Justice of England, at a special convocation in Convocation Hall, Toronto.

Between 250 and 300 people have been killed and more than 2,500 injured in less than 18 months past as a result of religious conflicts between Hindus and Moslems in various parts of India, Lord Irwin, the viceroy, stated in addressing the legislative assembly at Simla.

John B. Simpson, a British scientist, has left Edinburgh, Scotland, with the intention of making his home in an iceberg for three months. He was accompanied by a Samoyede dog, "My purpose," said Simpson, "is to gather material for a book on the ice fields."

A valuable hen. An offer of \$1,000 for the famous hen No. 6, or \$3,000 for a pen of ten birds including this world record layer was turned down by the University of British Columbia on account of the great value of the bird for breeding purposes.

Buildings lined with wool are better for reproducing sound than those with wall of other material.

A bluish is one of the few things that cannot be counterfeited.

Diarrhoea Summer Complaint HE ALWAYS USES

Mr. T. F. McGregor, McLean, Alta., writes: "Over forty years ago my mother used to give us Dr. Fowler's Extract of Wild Strawberry for diarrhoea and summer complaint. All through the years since then when troubled with an excessive looseness of the bowels I have been accustomed to take a few drops of the same old, reliable remedy and it always seems to have the desired effect, no matter what the cause."

Don't Accept a Substitute. This valuable preparation has been on the market for the past 50 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

W. N. E. 1697

Motor Penetrates Far North

English Woman Breaks Distance Record By Three Miles. Two British motorists who have just achieved the feat of breaking the "farthest north" record in a motor car, were turned back when 270 miles within the Arctic circle by swampy conditions, arising from the intense heat.

The Hon. Mrs. Victor Bruce and party, who have returned to London after a 6,000 miles' trip through Northern Europe to Finland and Lapland, went about three miles nearer the North Pole than any previous motorist has penetrated, and got within 40 miles of the North Cape.

She averaged 270 miles a day for 28 days, some of the journey being over rough tracks in Northern Scandinavia. The enterprise was undertaken partly with the object of inspecting the roads of Sweden on behalf of the Automobile Association, and partly purely for the sake of adventure.

Mrs. Bruce was accompanied by her husband (a son of Lord Aberdare). "One of my great ambitions," said Mrs. Bruce, "was to be able to say that I enjoyed a battle in the Arctic Ocean, but the swamps in Northern Lapland prevented us from getting to the coast at all. We were fully prepared for very cold weather, but actually the average temperature in the Arctic areas which we traversed is about 50 degrees in the shade at this time of year."

"It is not so strange when you think of it for the sun never sets in summer in these latitudes. It was rather remarkable to observe the extent to which the motor is penetrating into the Far North of Europe, and I anticipate that within a very few years roads will be available for our tourists right up to the North Cape."

Irish Free State Issuing New Coins

Design Of Young Yorkshireman Won In World Competition

From designs submitted by leading sculptors from all parts of the world, that of Mr. Percy Metcalfe, a young Yorkshireman, has been accepted by the Irish Free State Government for its new coinage.

A hen, a sow, a hare—to illustrate the food-producing power of the Irish Free State—and a salmon—which is symbolic of an old Irish legend relating to the fish which swam in the "sacred well"—all had to be worked into the winning design. Mr. Metcalfe, who is being given sittings daily by King Vaud in connection with a portrait in metal which he has been commissioned to execute, declared that his Irish success was "his greatest yet." Competitors against him were drawn from all parts of the world, and included the famous Serbian sculptor Mestrovic.

The designs are eight in number, from the half a crown to the farthing. In size, they will be identical with the British coinage.

Very Likely Did

Julia Parker was seen on Broadway the other day, when it was warm, wearing a fur piece around her neck.

"How can you wear a fur in the summer?"

"Well," replied the dancer, "the animal who wore it originally used it in the summer, didn't he?"

First Shipment Of Antelope

The first shipment of antelope from Canada to the U.S. will be made at an early date, Charles Blazer, rancher, at Lake Newell has contracted to deliver 22 head of antelope to a Texas banker.

Witness Centenary Celebrations

P. Ashby and C. E. King, from Exbridge, England, returning home on the Guard liner Ausonia from Montreal, after a visit to Exbridge, Mass., where they witnessed the centenary celebrations, and Exbridge, Ont.

"The wonder metal of the age" is a fitting term for Aluminum. Its lightness, brightness, freedom from rust, and many other good qualities, make it a container par excellence for good tea. Red Rose Tea is packed only in this modern metal package.

Japanese Plan To Fly Across Pacific

Long Distance Flights Have Aroused Their Interest

The latest successes in non-stop flights have stimulated Japanese interest in aviation and efforts are being made to launch tangible preparations for a Japanese attempt to fly the Pacific Ocean next year. It is considered that the chances of such a flight taking place or of Japanese air-men or machines being ready for it within 12 months are small.

The decisive facts are that Japan possesses no aeroplane capable of making the journey and has no pilot, civil, military or naval, with the necessary skill and technical ability. A foreign plane might be bought but public opinion realizes that half the honor would be lost by such a proceeding.

The status of aviation in Japan is correctly reflected by the fact that Japan's record for continuous flying is only 11 hours, while two hours is the record for night flying.

The best Japanese achievement hitherto, and the only one of international note, is the 1925 flight to London via Siberia made by two civilian pilots.

Among the reasons advanced to explain Japan's backwardness are: First, that Japanese airmen have plenty of courage but lack the initiative and that enthusiasm for the art of flying which characterizes Lindbergh, Chamberlain and Earhart.

Secondly, the Japanese are "unmechanical" and lack "engine sense." For example, they often fail to notice when their motor starts missing.

Thirdly, official regulations hamper practice, for the air above Japan is said to be unusually tricky, thin and full of holes of variable quality.

Fourth facts reveal how much remains to be done before a Japanese airman can wing his way to Seattle.

Mining Men Go To Europe

Will Investigate Treatment Of Coal For By-Products In Germany

Mr. Charles Stewart, minister of mines, and Dr. Charles Cammell, deputy minister, have sailed for Europe. Mr. Stewart is one of the Canadian Government representatives to the League of Nations conference at Geneva.

After the sessions of the League he and Dr. Cammell will visit many of the industrial centres of Germany and Poland for the purpose of investigating the progress made in the past few years in the treatment of lignite and bituminous coal for by-products in Germany.

Producers in Germany claim that they can secure oil from coal at a less cost to them than crude oil.

Getting Rife Of Circumstances

It is related that John Lawrence, who ruled the Punjab seventy years or so ago and who later became Viceroy of India, used to say that when he came across a young Britisher in the Indian civil service who was encumbered with a wife and a piano, he hustled him about from one jungle station to another till the young man parted first with the wife and then with the piano.

Adversity sometimes transforms a coward into a hero.

SUNDAY SCHOOL LESSON

SEPTEMBER 11

SOLOMON DEDICATES THE TEMPLE

Golden Text: "I was glad when they said unto me, let us go unto the house of Jehovah."—Psalm 122:1.

Lesson: 1 Kings 8.

Devotional Reading: Psalm 122.

Explanations and Comments

1. The Great Procession With the Ark and the Tabernacle, verses 1-2.—It was during the Feast of Tabernacles, which began on the fifteenth of the seventh month and lasted seven days (Lev. 23:34), that the elders of Israel and all the heads of the tribes brought up the ark of the covenant out of the city of David, which is Zion. "Both the House of Commons and the House of Lords were present, and we would put it for the elders were the chosen representatives of the people, and the princes of the fathers' houses were the hereditary leaders. In addition there was a vast attendance of the rank and file" (R. C. Gillie). Two processions advanced from different directions. One came from Gibeon and bore the sacred tabernacle with its goat's-hair covering, boards of acacia wood, and all its holy vessels—the brazen altar, the golden candlesticks, the table of the bread, and the brazen serpent. On Mount Zion this procession joined the other which bore the ark away from its temporary tent erected for it in Jerusalem. David, as the two processions proceeded to the temple, Solomon and a great congregation with him sacrificed a host of sheep and oxen. "The road was flanked with the streams of blood. The air was darkened and scented with the clouds of incense, the songs and dances were unintermittent. Onward the procession moved up the slope of the hill, its end, cut off after court of the temple. It reached the Holy Place" (Stanley). By this Jewish slaughter Solomon was honoring God in the best way known in those days. It was a primitive method of saying that king and people set no limits to the honor they wished to pay to the service and worship of God.—R. C. Gillie.

Motor Exhaust Kills Tulips

Famous Dutch Flowers Die in Gardens Of Paris

The famous tulips of the last time they have bloomed for the tulip time. They are victims of the exhaust of automobiles in the Rue de Rivoli. The bulbs were presented to the city of Paris by Dutch growers five years ago, and were planted in the Tuliperies Gardens, an ideal setting for their masses of gorgeous colors. But each year they have dwindled and it was found that the prevailing westerly winds blew on to them a low wave of noxious gas from passing automobiles, affording an additional proof of the deleterious effect of the growing number of automobiles on the atmosphere of Paris.

Advertising Canadian Bacon

Fine Quality Is Stressed By Empire Marketing Board

That the Empire Marketing Board is following up its work is evidenced by the display advertisements in the leading papers of the United Kingdom. Home and Canadian bacon is one of the products recommended to the consumer on the ground that it has mildness of cure and the quality. For all who wish to get an appetizing meat for breakfast the empire brands meet every requirement—either home grown or from Canada. The fact is emphasized that Canada sends the very best that is turned out from the packing plants.

Jap Emperor Is Teetotaler

It is a little known fact, even within the confines of the Japanese Empire, that the Emperor of Japan is a staunch teetotaler. On the royal banquet tables not a drop of alcoholic beverage is set. When his majesty entertains others, however, there is the necessary wine, but the customary glasses are not placed before his majesty. He drinks all toasts in aerated or plain water.

Would Look Suspicious

A certain New York judge says that when he sees a man with "receding chin, protruding jaw, a wide, unwinking stare, a droop in the eyelid, a low brow, a bumpy brow, thick hair and ears set at right angles to the head," he is convinced he has a criminal before him. Anybody of that description surely would arouse a grave suspicion, at least.

Wickham—"Do you know anything about wave lengths?"

Myers—"Sure. Half the stations are on one and the other half are on the other two."

An elephant's bath requires 150 pounds of soap and more than \$100 worth of purest Indian oil.

Make the Penalty Fit the Crime

Proposal Made That Whipping Be Added To Jail Sentence For Stealing Cars

Whipping with a strap persons convicted of theft of motor cars is one of the amendments to the criminal code proposed in the report of the Canadian Bar Association's committee on administration of justice.

The report was presented to the association at its annual meeting by Judge E. Coatsworth of Toronto.

Judge Coatsworth urged immediate legislation by the Dominion and provincial parliaments to incorporate into the criminal code the important amendments suggested in the committee's report.

Concerning the penalties for auto theft the committee recommended that instead of the present one year sentence provided by the code, the penalty be two months' imprisonment with a whipping in the second month with a strap instead of a cat-o-nine tails.

The committee also advised provincial legislation for supervision of persons let out on suspended sentence; for a system of parole, and for "effective dealing" with all the feeble minded and mentally afflicted both when in court and in confinement.

World's Finest Airship Station

New Building At Croydon England Is Nearing Completion

London, It is claimed, will have the finest air-ship station in the world when the new hotel being built at Croydon is completed.

From terraces on the flying-ground side of the hotel, visitors, while they are having lunch, tea, or dinner, will be able to watch giant three-motored passenger planes ascending for Paris, Berlin, Moscow, or Constantinople. After flying from London to Berlin, travellers will be able to proceed by organized air-stages right through to Paris.

The crowning wonder of the new station will be the great control-tower. Here, high up in a glass-windowed chamber, experts, using every new aid science can give them, will guide the 100 mile an hour rushes of the passenger planes and also the slower flights of the big air freighters.

Were Great Statesmen

Fathers Of Confederation, Praised By Sir Arthur Currie

"No council of statesmen in the world's history has surpassed the Fathers of Confederation for keen and practical mentality, for sagacity, for judgment, for self-effacement, and idealistic vision. The road they travelled was a difficult one, beset by innumerable pitfalls. They forgot their differences, the provincial rivalries, their creeds and nationalities in their hope for a greater Canada."

This was the tribute paid by Sir Arthur Currie, commander in chief of Canadian forces during the Great War, in the course of an address before the Military Institute at Vancouver.

Energy From The Sun

The time is near, says Charles F. Kettering, New York inventor, when the energy of the sun will be put directly to work instead of storing it in coal and oil deposits and using it as now is done. Uncounted billions of potential horsepower are going to waste each day, he says, because the sun's rays are not used.

"What good is a college degree?" "Why, with a degree and a million dollars a man is a success."

SELECT SITE FOR MOORING MAST NEAR MONTREAL

Ottawa.—Hon. J. L. Ralston, Minister of National Defence, has announced that negotiations for the purchase of a parcel of land near Montreal, containing approximately one square mile for the site of the mooring mast, have been practically completed. The site selected is that recommended by Major G. H. Scott and A. H. Gibbs, officers of the air ministry, who visited Canada in the early summer to assist in the choice of a suitable location.

It lies on the South shore of the St. Lawrence River, some six miles from the centre of the city of Montreal, approximately four miles from the Longueuil Ferry wharf and adjacent to St. Hubert Station on the main line of the C.N.R.

It is part of an open, level plain, well drained, of good surface and in every way suitable for its purpose, the Minister stated.

Uniform Rate Necessary

Present Restrictions Hamper British Immigration Says Dr. Black

Montreal.—Restrictions which apply to the low passage rate render it difficult, if indeed not impossible, for any considerable number of British people to avail themselves of that rate to come to Canada and settle here on the land," said Dr. W. J. Black, director of colonization of the Canadian National Railways, who has returned from Europe.

Dr. Black suggested that a flat rate should be adopted, declaring a uniform rate was necessary and that application of such a rate should be without any complex series of re-striking regulations.

"Due to the restriction of entry to the United States," said Dr. Black, "Canada now has an opportunity to secure a considerable proportion of the stream of immigration, which heretofore has flowed into the United States and which has greatly helped develop that nation during the past 60 years."

Mounties Return From Far Northern Interior

Opened a New Police Post On Liard Lake

Prince Rupert.—After spending fourteen months in the remote regions of the Northern interior during which time they opened a new post of the Royal Canadian Mounted Police at Lower Liard on Liard Lake, Inspector T. V. Sandys-Wunsch, Sergeant Paton and Constable Cooper have returned to Vancouver. With them was John Too, an Indian, who had gone insane in that wilderness, who will be lodged in Essondale.

Inspector Sandys-Wunsch, it will be remembered, figured prominently in the wilderness murder case which was tried in Prince Rupert two years ago and which resulted in the conviction for manslaughter of Big Alex, who has since been released and returned to the Liard River district.

New Laying Record

Saskatchewan Battered Plymouth Rock Hen is New Champion

Saskatchewan.—A Battered Plymouth Rock hen owned by the University of Saskatchewan has made a new record for egg production.

Completing her pullet year, this new champion has to her credit a total of 239 eggs in 266 days. Not only is this a new record for Battered Plymouth Rocks, but as far as is known it is a new record for all heavy breeds of poultry.

This bird was bred and raised by the poultry department of the University. She is known as H.2463.

Asked To Appear in Movies

London.—King George and Queen Mary have been asked to appear in a "speaking movie," which will be shown in London this winter in connection with the admiralty's film dress film reconstruction of the battles of Coronel and Falkland. The talking pictures are expected to be the sensation of the year.

Has Population Of Million

Montreal.—In the preface to the annual report of 1928, which has been published and distributed by the city treasurer, are found statistics concerning Montreal which show it to be one of the nine largest cities of the North American continent with a population of 1,000,000.

W. N. U. 1497

Popularity Of Lindbergh

Seven Million Dollars Involved In Business Offers Since He Made Famous Flight

New York.—Charles A. Lindbergh can have \$10,000,000 by going through a real marriage ceremony in front of a movie camera and \$6,000,000 more by accepting the business offers tendered him since he made his non-stop trans-Atlantic flight, says Commander Fitzhugh Green, the lone eagle's chief secretary, in a popular Science Monthly.

Commander Green, who has completed a check up on mail and other communications to Lindbergh, says that among the 3,500,000 letters and 100,000 telegrams and cables received, were at least three proposals that the young flyer join in an attempt to reach the moon by rocket shot from the earth. Lindbergh also received thousands of proposals of marriage. The aviator's mail included also 14,000 packages.

Lindbergh poems, sent in his mail, numbered 5,000 and upwards of \$10,000 was received in return postage. More than 500 "close relatives" asked him to "do something for them." More letters came from women than from men and letters from girls outnumbered those from boys four to one.

Col. Lindbergh answered many of the letters in longhand, but thousands found their way to the waste basket.

New Doukhobor Leader

Son Of Former Leader Leaving Russia For Canada

Yorkton.—Peter Verigin, son leader of the Doukhobors, second son of the former leader of the Doukhobors, in Canada, leaves Moscow September 2, for this country, according to word received by a prominent member of the Doukhobor colony near Yorkton. He will sail from Southampton on the Berengaria for New York September 10. Permission for Mr. Verigin to leave Russia was extremely difficult to secure from the Soviet Government. Negotiations to this end have been under way ever since the death of his father in a railway accident two years ago, and many obstacles had to be overcome. Mr. Verigin will be accompanied by Paul Ivanovich Blinnikov as travelling companion.

Makes Altitude Record

French Aviator Attains Height Never Before Reached By Man

Paris.—Aviators intent on breaking the world's altitude record must climb higher than 24,551 feet in consequence of the feat of Jean Colville who topped his own record by almost 1,700 feet. Colville's former altitude record was 12,432 metres and the new mark is 13,900 metres.

"Never again, I don't want to fall off the earth," exclaims the aviator, who Frenchman when informed that he had attained a height never before reached by a human being.

Would Control Flights

Washington.—Rigid control of all future trans-oceanic air flights will be insisted upon by the National Aeronautics Association, which announced that while it disclaimed any desire to discourage "individual initiative in the quest for new records" it would demand fitness of flying equipment and competence of personnel as indispensable conditions to sanctioning such flights.

Sugar Industry For B.C.

New Westminster, B.C.—Arrangements for the establishment of a beet sugar industry in the Fraser Valley by an English company, capitalized at \$2,000,000, have been completed, according to word received by the New Westminster Board of Trade. The company will acquire a large area in the Fraser Valley worked by English and Scotch labor. The plant, it is believed, will be located in New Westminster.

Poultry Congress A Success

Ottawa.—It is now stated by those who had charge, that the third World's Poultry Congress, held in Ottawa from July 27 to August 4, was a greater success than even its sanguine promoters predicted. Forty-two countries sent delegates and live birds numbering 10,000. There were birds from the poultry farms of King George, the Prince of Wales and various reigning monarchs of Europe.

Drink More Milk

Minneapolis.—Mrs. Ella Boole, Brooklyn, was re-elected president of the National Women's Christian Temperance Union, in annual convention held. Milk drinking has increased 27 per cent, and ice cream consumption also has gained since prohibition went into effect, said Miss Ella A. Marshall, Chicago, in an address before the convention.

ATTEMPT TO CIRCLE THE GLOBE

Here are the latest plans to fly across the Atlantic, William Brock, (left) and Edward F. Schlee. In their Stinson-Detroiter plane, similar to craft in the Windsor-to-Windsor and London-to-London dashes, they recently flew across the Atlantic from Newfoundland to England in an attempt to circle the globe in 15 days.

GOOD CROP NOW BEING GARNERED IN PRAIRIE WEST

Ottawa.—Canada is in a fair way to garner another good crop, says a review issued by the Department of Agriculture based on reports submitted by the superintendents of the Dominion Experimental Farms. The survey includes wheat, coarse grains, potatoes, hay and forage, apples, tobacco, sugar beet, and turnips and covers all the provinces.

The wheat producing provinces of Western Canada are referred to separately in the review. In Alberta it is stated very heavy yields are indicated in all parts of the province. "No frost or rust damage is in evidence. Cutting is well under way in the South and just started in the central part of the province. A bumper crop in the Prairie River region is indicated. "In fact," says the report, "the province, as a whole, seems to be ready to harvest a nearly record crop of good quality wheat."

Cutting is general in Southern Saskatchewan, but just beginning in the more northerly parts according to the review. In Saskatchewan some injury has been done by frost and rust but this is not likely to cause any great damage. On the whole, prospects in Saskatchewan are for a very good crop with yields somewhat above the average. With respect to the Manitoba wheat situation the bulletin states that about 40 per cent of the wheat crop has been cut in the Southern part of the province and promises to be up to average.

In Central Manitoba, the crop is heavy and is being injured to some extent by rust. In the more northerly parts the crop is rather late and may be affected by rust and frost.

The wheat crop in Quebec and Eastern Ontario will be about average. It is stated, in Western Ontario it is considerably better than last year.

Huge Sum For Defence

New York.—The seven year war struggle to save Sacco and Vanzetti from death in the electric chair entailed expenditure totalling more than \$500,000, Alvin Pelican, treasurer and founder of the Boston Defence Committee, announced here.

"Fore" Replaces War Whoops

Were the state old chiefs of the past to sit up in their graves and watch this young chief driving from the right toe on the Banff Golf Course, there is no saying whether they would grant in disgust or with approval. Chief Big Buffalo, who is seen about to drive, thinks they would be curious and would wonder their fate at having to sleep on white fur rugs and in white robes, their grandsons sent whaling down river stretches that once echoed with their war whoops.

Public Opinion Against War

Increased Participation Of The Masses In Peace Movements

Vancouver.—Increased participation of the masses of the people in formulating the attitudes of nations toward each other was given by Sir George Foster, in addressing the Canadian Club here, as one of the forces operating against war. He cited as an example that not long ago war seemed possible between the United States and Mexico, but that immediately the chance of conflict became known people from all parts of the country protested to Washington. He said the history of negotiations before other conflicts showed that decisions were made on the prejudices of a mere handful of people.

"Heard the negotiations which occurred before the last war and note the few persons who participated in them," he said.

Sir George spoke on "The New Internationalism." He said the most stupendous accomplishment in all history was the fact that the peoples of 63 nations had formed themselves into an association of nations to devise new methods of carrying on relations.

Report Labor Increase

Data Shows Gain In Prairie Provinces During July

Regina.—The Labor Gazette reports that in the prairie provinces last month the greatest gains in employment were in construction, manufacturing, transportation, service and communications, while logging (in which the movement was seasonal) showed a decline. Data were compiled from 775 employers with an aggregate staff of 118,556 workers, as against 112,998 in their last report. This increase of 4,558 workers exceeded that registered on July 1, 1926, while the level of employment was higher than on the same date in any other year of the record.

No Increase In Immigration

Ottawa.—According to the Department of Immigration, June brought 18,625 new comers to Canada as compared with 12,131 in June of last year—an increase of 48 per cent. The total for the first quarter of the fiscal year was 57,454 compared with 45,403 for the same quarter of 1926—a gain of 60 per cent. Of the June figures 7,272 were British, 2,642 were from the United States and 8,713 from other countries.

Parties Prepare For Election In Ireland

Voting Will Take Place In Free State September 15

Dublin.—All the political parties of the Free State have been devoting their energies the last few days to preparations for the legislative elections called for September 15, and the campaign has begun in earnest.

William T. Cosgrave, president of the Free State government, and nearly all his ministers, were to start extensive speech making programs throughout the country.

The Flanna Fail, Republican party of Eamon de Valera, has already published the names of 49 candidates. All the laborites are recontesting their seats and will be reinforced by other candidates. The government has not yet announced its candidates and Capt. William Redmond has given no indication of his plans for the National League Party.

Complain About

History Books

Report Says Text Books Used In Chicago Are Pro-British

Chicago.—Historians used in Chicago public schools were indicated as anti-American, pro-British and "grossly distorted" in an exhaustive report filed with Mayor Thompson.

John J. Gorman, former congressman who was commissioned by the Mayor to investigate the text books, said he found "they omit facts and distort and minimize many of the real characters, events and ideals hitherto held sacred to American history."

The report came fast on the heels of the suspension, under charges of insubordination, of William McAndrew, superintendent of schools, whom Mayor Thompson has assailed as "the stoic penguin of King George" and the instigator of alleged anti-American teaching in the schools.

Crop Pest Control

Meeting Held At Saskatoon To Discuss Problem

Saskatoon.—Entomologists representing the prairie provinces, Ontario, Minnesota, Montana, and North Dakota, met at Saskatoon in annual conference of the Great Plains Crop Pest committee at the University of Saskatchewan. They were in session here for two days, during which time they discussed problems of control and eradication of farm crop pests.

There have been no very serious outbreaks of pests during the present season, delegates stated at the opening session.

Ship Cream To England

Quebec.—The Provincial Department of Agriculture announces that its experiments, conducted in co-operation with the Development Branch, Canadian Pacific Railway, in the shipping of sweet cream to England, comprising four separate experiments, have been entirely successful, the cream arriving in uniformly good condition. Now that the possibility of this new development has been demonstrated it is expected that commercial interests will enter the field.

GERMAN ENTRANT IS WINNER OF THE MARATHON SWIM

Lake Shore, Toronto.—Four miles and four and a half hours ahead of his nearest rival, Ernst Vierkötter of Germany crawled across the finish line to victory and a cash prize of \$20,000 at the William Wrigley twenty-one mile marathon swim through icy cold Lake Ontario waters. Vierkötter's time was 11 hours, 42 minutes and 38.2 seconds, a record for the distance.

Georges Michel of France, once conqueror of the English Channel, finished second to collect \$2,500. Both men finished strongly, not showing any visible sign of great fatigue as a result of the long and terrible grind from morning until night, after ploughing their way to the shore from 200 yards in one of the greatest sporting events ever staged on the North American continent. Michel's time was 14 hours and 12 minutes, using an easy tugboat stroke.

Nearly a quarter of a million people welcomed Vierkötter while several thousand valued the intervening hours to greet the second prize winner with a tremendous ovation.

William Erickson of New York, the "doctor," was the last to finish, but owing to withdrawals took third place in the prize list. His time was 18 hours and 59 minutes.

ANTI-SMUGGLING PLANS DISCUSSED AT WASHINGTON

Washington.—The Royal Canadian Customs Commission left for home after holding four formal meetings and several informal meetings with state, customs, coastguard and prohibition authorities here. It was permitted to look into the workings of the United States anti-smuggling machinery. It investigated the frequency of the United States customs system in general and three or four branches of the system in particular. It received some suggestions from the United States authorities for improvement of conditions along the border. The commission will take all these things into consideration while it is preparing its report to the Canadian Government after the close of the Ottawa sessions.

The commission while in Washington confined itself strictly to inquiry into procedure in the United States and any negotiations for a change in existing agreements between Canada and the United States will be initiated later on by the governments themselves.

Little information has been given out as to what actually happened at the conference here, but in unofficial talks with newspapermen, United States officials have let it be known that they are working toward tidying up of the 1924 whiskey treaty between Canada and the United States. Assistant Secretary of the Treasury, Seymour Lottman, in charge of customs and coastguard patrols, announced that the border patrols would be increased from 200 to 400 men in the Buffalo-Lake Huron district, and prophesied that the Treaty States would increase the number of its coastguard vessels on the Great Lakes if the smuggling of liquor by this route continues.

It is known that United States would like Canada to establish her own consular agents in this country. The commission no doubt has been told that this would make it easier to prevent smuggling both ways, and that consular certificates would go far toward minimizing fraudulent invoicing and double invoicing, which methods are now being used to cheat the Canadian Government of revenue.

Noted Explorer Is Slain

Reported That Members Of German Expedition To Interior Of China Are Massacred

New York.—The New York World says Dr. Wilhelm Filchner, former staff officer of the Imperial German Army and noted explorer, and all of the members of an expedition he was leading, have been reported massacred by natives of the western part of Szechuan province, China. The World's wireless station picked up a German trans-oceanic wireless press message to the effect that a British resident of Urumchi in the northern part of India, just south of Tibet, had reported that Filchner and his party had been killed.

Alleged Spies Arrested

Leningrad, Russia.—The political police have arrested an alleged group of 25 spies, charged with espionage in behalf of the British intelligence service in Finland. Most of the accused, including several women, held various positions in the army, navy and civil service institutions, and are alleged to be in charge of a British naval captain with headquarters in Finland.

Under Royal Patronage

Calgary.—The Alberta Wheat Pool is now under Royal Patronage, the announcement being made in the current issue of the U.F.A., the official organ of the United Farmers of Alberta. It announces Prof. W. L. Currie, the manager of the E.P. Ranch, on behalf of H.H.H. the Prince of Wales, had signed a post card of covering 1,000 acres.

Human Fly Robs Hotel

Los Angeles, Cal.—A human fly burglar descended from the roof of the hotel at Elkslandia by finger and toe holds, entered the room of a sleeping guest, through the window, and obtained \$12.30 in cash and jewelry valued at \$15,000. Detectives said a prints made by fingers and toes in the dust of window ledges were the only clues.

Saved Millions For Employers

Detroit, Mich.—James E. Ryan, Smith, steel expert of the Ford Motor Company, died Monday after a long illness. Smith saved the company \$200,000,000 in four years by use of a new method to harden steel, according to a statement written by Henry Ford in his autobiography.

Weird Occurrence At Tower of London

Soldier's Death Said To Prove Truth Of Old Superstition

The raven, bird of ill omen and forerunner of death, is the central figure in a weird old tale which occurred at the Tower of London.

Ravens have made their home at the Tower for hundreds of years, and it is a superstition among the troops that if a raven's death is accompanied by a soldier's life, the penalty is paid.

A few days ago a guardman was leading a dog through the square. He was confronted by a raven, credited with 50 years, which attacked the dog vigorously with his beak, still sharp for all his advanced age.

The guardman repelled the attack by means of his stick and ultimately killed the bird.

The barracks were filled at once with dread forebodings.

The raven's body was buried with due ceremony, and a piece of wood, suitably inscribed, was erected to mark the grave.

The sequel was not long delayed. The following night, Guardman Arthur Chidley overstayed his leave, tried to enter the Tower by climbing the wall, but he fell into the moat, breaking both his legs. He was the following morning—although the deepest sympathy was expressed for him—generally voted lucky in escaping the full penalty of the raven's vengeance.

He died later in the day, however, ere long having developed.

The officer whose duty it was to report the details of the case visited the scene of the accident. He found that the unfortunate guardman had fallen directly on the raven's grave, the front of his body being directly above it.

Question Definitely Settled

Leaving Tower Of Pisa In No Immediate Danger Of Falling

The question of whether the leaning tower of Pisa, famous for its instability of which have been advanced periodically in the last twenty years, is really in danger of falling has been definitely settled by a special commission appointed for that purpose. The commission finds that the inclination of the Tower is indeed increasing, but at such a slow rate that no immediate apprehensions need be felt.

According to an accurate measurement the top of the Tower has moved slightly more than half an inch in the last twenty years. In more recent years the rate of movement has increased somewhat, but for the last nine years it has remained steady at about four-hundredths of an inch per year.

Though it is undeniable, therefore, that the leaning tower will eventually fall unless measures are taken to prevent its movement, the commission concludes that there is no immediate danger.

The commission counsels prudence. In adopting any scheme to reinforce the base of the tower, expressing fear that any attempt to tamper with the foundations may do more harm than good. For the present it suggests draining the ground around the tower, because its foundations were found to be in a bad condition owing to the infiltrations of water.

Meanwhile it proposes to continue its studies to devise the best possible means to check any further increase of the inclination.

Setting In Peace River District

Fifty families have settled in the Windyville district, made famous last December by Herman Trolle's winning of the two world's championships of wheat and oats at the International Hay and Grain Show at Chicago. Some of these families are from France, under the charge of Father Parnon of the Oblate Order. He states that more families are about to come from New Hampshire.

Jasper Park Lodge

Jasper Lodge in Jasper National Park, Alberta, stands on the shore of the beautiful lake Beauport and a beautiful growth of spruce and lodgepole pine. It comprises a group of buildings, constructed of logs cut from adjacent forests, and its popularity has necessitated the addition of new structures nearly every year since its opening.

Sheriff: "Did he tell you that automobile thief?"
 Deputy: "He was a lucky kid. We had chased him only a mile when our 500 miles was up and we had to change the oil."

Teacher: "While, what is an omnibus?"
 Willie: "A place where transatlantic rivers change their clothes."

W. N. U. 1297

For Business Purposes

Probably Good Reason For Excitement Over Prince Wearing Straw Hat
 London society, says a cable dispatch, is shocked. It has seen pictures of the Prince of Wales in Canada—pictures in which the heir apparent is wearing a straw hat. London society had expected that the Prince, while on tour in this country, would observe the conventions, and it appears that the wearing of straw hats is decidedly unconventional in the eyes of the best London society. The proper headgear on all except formal occasions is the fedora or derby or some other form of felt hat. It is so in England, and therefore it ought to be so everywhere from China to Peru at the poles and at the equator. But the Prince is more sensible than London society. He wears a straw hat in Canada because he finds a straw hat more comfortable than a felt one when the temperature is in the eighties and nineties and the sun dazzles; moreover, because most of the male Canadians wear straw hats in mid-summer. It is to his credit that he prefers to be comfortable rather than conventional.

Possibly, however, London society is not so much excited as the cable correspondent makes out. It may be that the eccentric does not extend far beyond the business circle, which is interested in the sale of hats, and that the indignation springs from a fear that the Prince's strange fancy may cause a decline in the demand for felt hats and leave large stocks of them on the shelves, to be disposed of only at a sacrifice.

Invariably a Careful Driver

Is Man Who Is Always Considerate In General Things

The good which the automobile does in giving air and recreation to people who might otherwise have to go without seeing the beauties of parks and gardens, the sea, the mountains, the woods, the fields, cannot be overestimated, although it is often lost sight of in the daily evidences of the harm that an automobile can do.

On the other hand, the automobile provides a means for thoughtless and irresponsible people to "make nuisances" of themselves. Pigeon-piercing, trespassing, littering up the place, tearing up shrubs and flowers, failure to take proper precautions against hitting dumb animals or to relieve their suffering when hit, leaving choking stones in the highway after fixing punctures, and starting forest fires by carelessly throwing cigarette and cigar butts out of cars are a few of the nuisance practices which might be mentioned.

In the long run, however, a man of good character, who is considerate of others in his general daily contacts, is invariably a thoughtful, reasonable driver.

Merchant Was Convinced

Learned By Practical Demonstration That Advertising Pays

Now that the Advertising Convention in London is in full swing and the doctrine that "sweet are the uses of advertisement" is being ardently preached, it may be apt to recall a pleasant tale of the live-wire canvasser for advertisements and the reluctant trader. "Nobody reads advertisements," maintained the trader. At last the canvasser offered a free "ad." just as a test. "You can do what you like. No one will read it," said the obtuse one. So the canvasser arranged for a three line notice, which was hidden away on an inner page, to the effect that the trader in question wanted to buy a rat.

Four hours after publication an urgent telephone message was received at the newspaper office asking that the notice be withdrawn at once as 177 rats had already arrived on approval.

Can Metalize Plaster Statues

A German artist-inventor has devised a new technique for literally turning plaster statues into metal ones, by means of an ingenious "extrusion pistol" which projects a fine stream of molten bronze or other metal against the inside of a hollow plaster cast with such force that it carries on through the porous substance and comes out as a thin film, hardening on the outer surface. The process is said to be extremely rapid, five minutes operation of the pistol being sufficient to metalize a plaster cast the size of a man's hand.

"What is your trade?" asked a benevolent old man to a person he had just helped.

"I'm a picker."
 "A picker? What is that?"
 "Well, I pick strawberries in July, peas in August, pockets in winter, and oaks the rest of the year."

The London Daily Express now has a circulation of close to 1,100,000.

Hardy Roses

List Of Varieties That Have Been Found Suitable For Home Gardens

The revised edition of the bulletin "Hardy Roses" as issued by the Department of Agriculture at Ottawa, first issued contains very useful information for those who are undertaking rose growing in their home gardens. Besides long lists of Hybrid Teas and Hybrid Perpetuals and Climbing roses that have done at least moderately well at Ottawa, certain of them are recommended as being especially suited for the small garden. In Hybrid-Perpetuals seven varieties in different colors are especially recommended for their hardiness, beautiful flowers, and cropping qualities. These include: Frau Karl Druschki, white; General Jacquemont, scarlet crimson; Her Majesty, pink; Hugh Dickson, crimson; Mrs. John Laing, pink; Mrs. Sharran Crawford, pink; and Ulrich Brunner, cherry red. If the list is to be still further reduced, Mr. W. T. Macoun and Miss Isabella Preston, the authors of the bulletin, would confine their selection to Frau Karl Druschki, Mrs. John Laing, and Hugh Dickson. Of the Hybrid Teas which are not quite so hardy but more constant bloomers, the recommendations include: Caroline Testout, pink; General McArthur, crimson; Grass on Top, pink; Lady Ashdown, pink; Lady Pirrie, pink; La Toque, pink; Mme. Edouard Herriot, coral red; Souvenir de Claudius Bernard, yellow; Willmore, shrimp pink.

The bulletin, which is No. 17, New Series, and is available at the Publications Branch of the Department of Agriculture at Ottawa, covers the whole subject of rose growing in Canada in such popular language as to be the ideal guide either for the beginner or the rose grower of experience.

Much Worse

Sam: "You know, man, Ah, done got stuck up there in the woods with a flat tire on each of my wheels, mah gears stripped, besides two burnt-out bearings."

Rastus: "That sure was bad, but it coulda been worse."
 Sam: "How could it ha' been worse?"

Rastus: "It coulda been me."

Production In British Columbia

The farms of British Columbia produced \$71,362,200 in 1925, breaking all records and gaining \$6,208,696 in value over the previous year, according to the final figures of the Provincial Statistician. Lumbering is the largest industry in the province with agriculture second.

Hullless Oats For Poultry

Cracked Hullless Oats Found Useful For Young Chickens

Hullless oats, that is varieties of oats that thresh out clear of the hulls, are particularly useful for the feeding of poultry. Experiments carried on at one Manitoba and one Saskatchewan Experimental Farm, with laying pullets showed profits of about twenty-five cents per bird in favour of the hullless oats. In the tests made pens receiving hullless oats in both grain and mash, were compared with pens receiving common oats fed in the same manner. Cracked hullless oats are particularly useful for young chicks. This test and many others are reported in the 1926 annual report of the Poultry Division of the Experimental Farms, distributed by the Publications Branch of the Department of Agriculture at Ottawa, which gives the results of much experimental work carried on at the Central Farm and at the branch farms and stations over Canada in all phases of poultry raising.

Population Of Canada

Statistics For Last Year Place Number At 9,378,000

Canada's estimated population in 1925 was 9,378,000, according to the preliminary report on vital statistics for the year 1925 issued by the Dominion Bureau of Statistics on data obtained under arrangement with all the provinces of Canada.

Ontario has still the largest population, viz., 3,146,000; Quebec follows with 2,562,000. The three Prairie Provinces form the third group—Saskatchewan, 821,000; Manitoba, 629,000; and Alberta, 608,000. British Columbia has a population of 368,000, Nova Scotia, 546,000, New Brunswick, 407,000, and Prince Edward Island, 87,000.

Flew Through Plate Glass

Mistaking a large plate glass window in front of a swimming pool at Banff, Alberta, for an open passage, a partridge flew into it breaking the pane and killing itself. The force of the flight was shown by the fact that the bird passed entirely through the glass and partly across the room within before it fell. It cost \$400 to repair the damage.

Studying The Reindeer Question

The Government of Canada has two experts at work investigating the possibility of introducing reindeer into the country near the mouth of the Mackenzie River. The experts have spent a year in the north, travelling on foot and by dog-team, and their study will take it is expected, another year.

Bucking Horse Champion

"Bring 'em on" says Pete Knight of Crossfield, Alberta, Canadian North American Bucking Horse Champion. He gained this title at the Calgary Stampede held in the west recently against competitors from all parts of Canada and the United States, and in doing so proved himself master of anything the western plains could produce in the way of

equine fury. The elaborate saddle that Knight is photographed holding is one of the trophies he won through his skill; another, symbolic of his cherished championship, is seen in the inset and was presented by Edward F. Albee, theatrical manager.

The Calgary Stampede which has become an annual event is regarded as the finest of its kind held on the continent.

Good Slogan For B.C.

Italian Saying Might Well Be Applied To Pacific Coast Province

The Italians have a saying, "See Naples and die," meaning that nobody should omit to visit this city before they leave this mortal coil. The people of British Columbia might well adopt that slogan, paraphrased accordingly, as their own, and tell it to the world.

Happily, the province of British Columbia is aroused to the value of telling the world about the scenic grandeur and the business opportunities of their wonderful territory by means of an advertising campaign in Canadian newspapers.

It is to Canadians that the facts should first be made known. Whatever country a man belongs to, he should see his native or adopted land first before spending large sums of money on travelling to other countries. There is, of course, a certain fascination in visiting foreign soil, but if he is seeking scenic beauty he has it in plenty at his own door, as to speak, and not only in abundance but in surpassing and overwhelming effect.

In this respect British Columbia has the most superb scenery in the Dominion. Nature has been lavish in fashioning the landscape of that province with a beauty which leaves humans awed and lost for words to describe it. Dr. Frank Crane, the well-known American writer and traveller, declared some years ago that of all places in the world he had seen, there was nothing to compare with the Canadian Rockies. And they are in British Columbia.

A journey to the coast by rail is the experience of a lifetime. Moreover, the province has a system of highways that enables the motorist to make the journey through the Rocky Mountains with safety and at leisure. Here again is a joy that is offered to every citizen of Canada and should be taken advantage of before thinking of trips abroad.

But for the man who is thinking of the province in terms of profit, it teems with fertile agricultural, fruit and vegetable soil, rich pasture lands, minerals, lumber and fishing opportunities in almost inexhaustible measure. Also it has a climate that is the kind in Canada to man or beast.

In short, British Columbia is a lovely country to see, a splendid country to make a home in.

"See British Columbia and die." — St. Thomas Times-Journal.

Feeling Of Writer

Expressed In Letter

Those Received From Cheerful People Are Always Enjoyed

You are always glad to receive letters from nice people. Why? The answer is that you know their letters are cheerful, that these writers have a way of telling things without the gloomy aspects, and—well, you feel good over hearing from them, that's all.

Again there are some people who seem determined to look altogether on the dark side of everything and their views are invariably reflected in the letters they send out to their friends and their business correspondents.

A cheerful letter is like a beacon light to a weary traveller who has lost his way; it comes with all the refreshing sweetness of a summer morn and the homely sunshine of spring.

His Turn To Move

Two men were seated in a railway carriage.

As soon as the train started one got up and opened the window. After a few moments the other shut it. The first man immediately rose and opened it once more.

"What do you think you are playing at?" angrily demanded the man who had shut the window.

"Drafts," said his companion sweetly. "Your move."

Cats Use Their Eyes

Some one has been taking cats and dogs to the moving pictures and reports that the dogs are bored and pay no attention to the goings-on on the screen while the cats are alert and excited; when the cats see a big fierce dog pictured, they arch their backs and split. Which proves what we all knew before, that dogs communicate with objects chiefly through their sense of smell, while cats use their eyes constantly and well.

Cook: "I've bought some mushrooms today, ma'am."
 Madam: "Are they edible?"
 Cook: "No, ma'am, they're good to eat."

Some men run a business along the lines of the man who used a cannon for shooting mice.

Unless a man is satisfied with himself he is not in the self-made class.

Improvement Of Hog Products

Chaffed Alfalfa Improves Winter Ration For Pigs

In the report for the year ending March 31st, 1927, of the Director of the Dominion Experimental Farms just issued by the Department of Agriculture at Ottawa, particulars are given of certain work carried on regarding the improvement of hog products and the animal itself. Investigations of the causes of soft pork is not considered complete except so far as that softness of side appears very closely linked with unfinished hogs. In an experiment relative to the methods of feeding with economy of gains one lot of pigs was normally hand fed, another lot self fed, a third lot heavily hand fed, and the fourth and last lot lightly hand fed. The self-fed lot made the largest daily gains at a cost of 6.5 cents per pound and the lightly-fed lot the slowest at a cost of 5.9 cents per pound. The heavily fed lot made gains at a cost of 6 cents per pound and the normally fed lot gains at a cost of 6.1 cents per pound.

A test in the use of chopped alfalfa to improve the winter ration of pigs tends to show that three per cent of chopped alfalfa of good quality increases the value of the ration for market hogs.

A litter of seven from a cross-bred Tamworth-Berkshire sow by a Berkshire boar was used to determine the feed cost of producing pork from weaning to marketable age and weight. The pigs averaged 34.5 pounds at the start of the test and weighed an average of 388 pounds when marketed. They consumed an average of 2.7 pounds of meal and 5.7 pounds of milk per pound of gain. The meal mixture was worth \$25 per ton and valuing the milk at 25 cents per hundred pounds would indicate that the feed cost per pound of gain was 5.66 cents.

Were Particular About Armor

Dandies In Medieval Times Wanted A Perfect Fit

The ballroom sleeves that were the last word in feminine finery in the 19th-century era, when women was a girl, have nothing on a pair of huge, puffed, engraved, and gilded sleeves of armor recently acquired by the Metropolitan Museum of Art. The evolution of medieval armor followed along lines comparable to that followed by some of the latest fashions which developed horns, teeth, and fins to the point where ungainliness superseded usefulness, according to Harbord Dean, curator of armor of the museum.

During the first half of the sixteenth century armor had begun to follow the outline of the current fashions of fashion. Clothes were no more designed to fit under the armor, but the armor was made to fit the clothes. Poppish princelings and affluent nobles insisted that armorers hammer out hardware to surround their immense sleeves and abbreviated Oxford bags, he explained.

The new acquired pieces are thought to have come originally from the Radziwili family, an ancient line of princes that held land near the frontier of Poland and Russia, and date back to around 1525. This opinion is strengthened in Mr. Dean's estimation by their resemblance to a finely engraved backplate from the same century, whose fine workmanship bears a close resemblance to the rching on the sleeves.

Commercial Flying In Alberta

The first passenger trip of the Letbridge Commercial Airways was made on August 7 between Hivory and Letbridge. It is announced that commercial flights will be arranged between Letbridge and Waterton Lakes. At the latter there is a Canadian National Park of hundreds of square miles in area. A large modern hotel has recently been opened there.

Grazing In National Forests

The regulated grazing of live-stock is permitted on Dominion forest reserves or national forests in the western provinces. The number of animals pastured in the national forests in the fiscal year ended, March 31, 1926, was: cattle, 40,722; horses, 10,322; sheep and hogs, 4,222.

He: "Would you mind telling me your age?"
 She (huguenotly): "Not at all, I'm eight."
 He: "Times what?"—T.H.H.H.

Prof.: "You have not learned very much in this class, have you, Smith?"
 Smith: "It's very decent of you, professor, to take the blame like that."

Spending your vacation is another term for spending your money

CHAPTER VII.—Continued

Every seat in the courtroom was filled. It is not every day such a thrilling case can be offered to the unemployed public. A young girl, pretty and well-dressed, found in a "Chinese den" with heroin tablets in her possession, who resisted arrest, fighting like a wild cat, injuring an officer, and now refusing to say a word, is no ordinary attraction.

The gallery, reserved for the purpose, swarmed with anxious spectators. There was going to be a great show. Men with blue-black whiskers showing through the skin of their faces; and black shirts with a button or so gone, also showing hairy chests; weedy youths, pimply of face; stoop-shouldered older men with warty noses and heavy brows, turned down to the butt like old cigars; eager-faced women, excited and sordid, the boulevard-cap type, hungry for sensations to fill their idle days; the dwellers, bargain hunters, car-mongers, resolute in their hate against virtue, they came crowding in, hungry, eyes and nostrils. Their liberty was sweet to these women this morning when contemplating the prospect of another woman's possible loss. It gave them that pleasurable thrill of comparative virtue.

The press table was full. It looked like a heart-interest story, — real thrill stuff—lovely, but misguided youth.

Holm's case was the first called. The police man brought her in and sat with her. Her face was pale, but there was no shrinking or fear in her eyes, and the eager crowd, whose eyes were all fixed on her noticed that she anxiously searched for someone. Her friend would have come if she were well enough. Holm thought, and again her rage kindled against the fate which prevented her from carrying out the very first favor her dear friend had asked her to do. She would know, though, that it was through no fault or carelessness of hers. Maybe she had died for lack of that medicine she had taken away from her. Maybe her dear friend had died—and there was no one who could ask. She must not ask—there was the trouble in her heart as she faced the crowd with its hundred eager searching eyes.

Under a glass roof, suspended by chains from the ceiling, sat the magistrate, alert, eager. He would see if this Finn girl would refuse to answer questions. He would put something of the fear of the law into her. These Finn girls! He knew them; hadn't he had enough trouble with them?

TO WOMEN OF MIDDLE AGE

Mrs. Wilson's Experience a Guide to Women Passing through the Change of Life

Hamilton, Ontario.

"I have taken several bottles of Lydia E. Pinkham's Vegetable Compound and I can truly say I feel much better. I was very nervous, too, and did not go out very much. A friend advised me to try a bottle of Lydia E. Pinkham's Vegetable Compound, so I did. I am a farmer's wife, and always worked hard until late in the day, and was in bed for two months. I began to feel like a new woman after the first bottle and I recommend it with great success, also Lydia E. Pinkham's Liver Pills. I am willing to answer letters from women asking about your medicines, as I cannot speak too highly of them."—Mrs. Emma Wilson, 471 Wilson Street, Hamilton, Ontario.

Sold by druggists everywhere.

W. N. U. 1925

out reforming the world, and the girls are on the street or in their clubs. I blame the club women of this city for the devilment that goes on among the young people, for the home has gone. I tell you, there's no religion in the homes any more, no respect for law,—nothing but birth control clubs, political clubs, bridge clubs, while the young girls and boys steal cars, joy ride and snuff dope. There you are!"

"The club dwellers were enjoying it. They did not belong to the women's organizations, so he didn't offend them."

Mr. Terry came forward and asked if he might give evidence.

"This girl's mother cannot be blamed," he said, "she is dead! Holm has been here only a few months. If our society is in the state you say—"

"Give your evidence, Sir," interrupted the magistrate, "this is a court of law—you are not preaching, remember."

"The girl is doing an honorable thing," continued the minister. "She is suffering for some other person's mistakes. She must have gone to Sam's place for someone I know the girl; she is honest and innocent."

"Let her speak, then. No one is stopping her. Let her clear herself."

"It would be an impudent thing to send this girl to jail, where she will associate with evil women. I plead for mercy. She struck the policeman in her right—she says so, too."

The crowd in the gallery were restless. They resented the preacher's coming into the place. The modern preacher who comes boldly into public life without apology is a laughing note in the antiquated philosophy of their class. They had much the same conception of a preacher as the magistrate had. Preachers should be sinning, tea-drinking, bazaar-opening carators, pallid and dandruff, with decayed teeth.

(To Be Continued.)

Esquimos Grateful To Dentist

Do Not Mind Having Teeth Pulled Says Professor Waugh

Esquimos like to have their teeth pulled, says Dr. L. M. Waugh, professor of orthodontia in the Columbia school of dental and oral surgery, in a report sent from the Labrador coast, where he is carrying on researches with the Eskimo tribes in Northern Labrador and the Ungava Bay region.

Esquimos make grateful patients when their confidence is once gained, states Dr. Waugh, and extraction brings smiles instead of wry faces. After he had extracted teeth from a group of Labrador Eskimos, including four women and five men, they smiled and thanked him, and all said that "it didn't hurt at all." Dr. Waugh indicates that this attitude is characteristic of all his Eskimo patients.

Says Prince Can Stand It

The King does not believe the Prince of Wales is leading too strenuous a life, is the report of a conversation which Harry Wright, an officer in the Mercantile Corporation, had with His Majesty near Lancaster, as told in the Weekly Dispatch. They talked about the Prince, and when Mr. Wright ventured the opinion that he was working too hard, the King said: "He is a young man, and can stand it. Of course, he is fond of travel, as young men always are, but when they get a bit older, they are not as fond of going abroad, are they?"

Had Not Been Missed

A young business man, after eight years of absence, alighted at the station of the town of his birth. There was, despite his expectations, no one on the platform when he knew. No one. Discouraged, he sought out the station-master, a friend since boyhood. To him he said he would be welcomed, and he was about to extend a hearty greeting when the other spoke first. "Hello, George," he said. "Goin' away?"

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Remover.

Hubby—"Thurrah! I'm going to have a holiday tomorrow!"

Wife—"Good! You can clean the cellar and the attic."

Minard's Liniment eases sore feet.

Use **MAGIC BAKING POWDER****Magic Tower At Croydon**

Controlling Air Traffic By Wireless Is Newest Wonder Of Science

The other afternoon I climbed a ladder into a little room at the top of a wooden tower and passed from the world of today into the world of tomorrow, writes Harry Harper in a London paper.

Perched above London's great air station at Croydon, that lofty chamber, with its maps, wireless instruments, and levers, is the forerunner of giant structures with intricate, almost human apparatus that will control air traffic which, rushing above oceans and continents, will span eventually the entire world.

On one side of you, up in that tower at Croydon, sits an operator with head-phones to his ears. On the other side the traffic controller, who every now and then waves little flags across the surface of a map.

It is our newest wonder of science, this, and its secret is the perfection of wireless telephony in its application to flight. From that tower words flash into the void and are heard by the airman posted somewhere high above mid-Channel. Not only does he hear them, but he himself talks freely to the far-off tower.

Most fascinating of all is to be up there as the light fades and night comes on. The controller leans over and moves a switch. Instantly there leaps to life, far across the "drome, the flash of an aerial light-house. It speaks into a telephone and a vivid glare of reddish light shines through the gathering gloom.

This is the night guide and gleaming beacon which pilots can see from miles away.

Another lever moves, and out on the surface of the "drome glow lights which guide an airman to his actual contact with the ground. And then, stealing down from out of the upper darkness, comes one of the big planes of Imperial Airways, its navigation and cabin lights gleaming.

People talk of supernum. Well, what can one say of those wizards up there in their tower doing things which, to ordinary folk seem the very best magic.

A Power Of Its Own.—Dr. Thomas' Electric Oil has a subtle power of its own. All who have used it know that it is the best of the best, valuable, pleasant, available, its use is innumerable and for many years it has been prized as the leading liniment for man and beast.

The Danger Of Forgetting

British Empire Through Modesty Losing Sight Of Accomplishments During War

Lord Haig rendered a service to the Empire by his presidential speech at the conference of the British War Service League. It was a high time that some one should speak out boldly and frankly about the magnificent accomplishments of the Empire in the Great War, the unprecedented burdens it shouldered, not only on its own behalf, but on behalf of the whole of civilization. Our incorrigible habit of belittling our own efforts and underestimating those of our neighbors in this instance been carried a good deal too far, both for our safety and our self-respect. It has allowed the propaganda of nations not united in self-adaptation to convince the world that it was they, and not we, who bore the main burden—a fact that is exceedingly damaging to our name and reputation abroad. But the damage does not end there; for the truth is that, with our own overdue modesty and the overdue claims of modesty, we have ourselves begun to forget the glory of the part we played.

Sometimes a woman's optimism degenerates into a pessimism because of his inability to diagnose a bad case of biliousness.

Early Chinese Knew Method Of Vaccination

Was Crude and Primitive But Embodied Modern Principles

Vaccination was practiced in China as early as the tenth century. It has been discovered by Dr. H. H. Chen of Johns Hopkins University Medical School, who is engaged in research at the West Chinese Library at McGill University, Montreal.

Dr. Chen, commissioned by Johns Hopkins University to make the investigation, found the information on vaccination in a book first published in 1566. The account of the vaccination is found in a story recounting the illness of a son of a Chinese premier in the tenth century. The story was of smallpox. That a second and younger child might be protected, the premier summoned a monk, learned in medicine, who was requested to devise a method of preventing the disease.

The monk's method, while crude and primitive, is said to have embodied all the principles of modern vaccination.

Little Helps For This Week

For I reckon that the sufferings of this present time are not worthy to be compared with the glory which shall be revealed in us.—Romans viii. 18.

But all through life I see a cross, Where song of God yield up their throes. There is no gain except by loss; There is no life except by death; There is no vision but by faith, Nor glory but by bearing shame, Nor justice but by taking blame, And that Eternal passion saith, "Be crucified with me, O men, and I will share your name."—Walter C. Smith.

The prime condition of a life ever found is a life ever lost. But there are times when we all feel poor and bare and sad for our losses, and wonder whether it was not all wrong when the treasure was taken away. If we are poor because we stand true to life and duty, we are poor only as the sower is poor, because he has to cast his wheat into the furrow and then wait for the sheaves of harvest. Our poverty then is our wealth, and our loss our gain.—Robert Collier.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

A Bottomless Well

Strange Lake In Arizona Maintains Unchanging Level

One of the most curious and most interesting natural wonders to be found in Arizona is Montezuma Well. This strange lake is located about the centre of the State in an isolated community. The well itself is some 200 yards across, and as far as it has been possible to determine, is bottomless.

The water in the lake is absolutely clear and pure. It maintains a certain level all the time, which is unaffected by the dryness or wetness of the season.

"The walls that rise precipitously above these clear waters and reflect themselves in them were at one time the homes of a populous community. For this is the very centre of what was once the cliff-dwellers' stronghold in Arizona."

Large Sugar Beet Crop
It is expected that a record crop of sugar beets will be harvested this year in Southern Alberta. Officials of the Canadian Sugar Factories Limited estimate that the crop harvested will be from 45,000 to 50,000 tons, as compared with 11,000 tons last year. The increase is accounted for by the fact that 500 more acres were planted to sugar beets for this year's crop than last year's.

BABY'S OWN TABLETS HELP A PRIZE WINNER

Baby's Own Tablets are without an equal for little ones. From the newborn babe to the growing child they are an absolute safeguard to health. Once a mother has used them she will use nothing else. Thousands of mothers always keep them on hand.

Among the mothers who state that Baby's Own Tablets are the best medicine for little ones that they know of is Mrs. Russell Hill, of Norwood, Ont. Her experience with the Tablets should be of great benefit to any mother who has not already given the Tablets a trial. Mrs. Hill says:—"I have five fine healthy children, and from the youngest to the oldest they get no other medicine but Baby's Own Tablets. When our baby girl was eleven months old she won second prize at the Norwood Fair, and when she was a year older she won first prize in competition with twenty-eight other babies. It was the Tablets that gave her the health and development to carry off these prizes. I always delight in telling other mothers what the Tablets have done for my children."

Baby's Own Tablets are sold by medicine dealers, or by mail at 25 cents a box, by the Little's Oriental Medicine Co., Brockville, Ont.

When it comes to a quick purging the food and his money are a close second to a woman and her secret.

Highland Gathering in the Canadian Rockies

1. Regimental Pipes
2. Scots in Canada
3. A Highland Gathering

One of the first subjects concerning Canadian events of late that the Right Hon. Stanley Baldwin touched on after his arrival in Canada recently was the Canadian Folk Song and Handicraft Festival held at the Chateau Frontenac last May. Premier Baldwin observed that such a Festival was invaluable in preserving and reviving the old-time customs, songs and handicrafts, indigenous to Canadian life and particularly the province of Quebec. On the heels of this musical success comes the announcement that a Scottish Gathering and Song Festival is about to take place at Banff, September 3 to 5. Scottish communities are looking forward with keen interest to the coming festival to which the Prince of Wales has given his patronage.

Scots in Canada played a memorable part in the development of the country, their names having prominence in many historic engineering, trading and exploration enterprises—such men as Fraser, Mackenzie, Thompson and many others in the past generations who have penetrated the mountains of the west. Here in these same mountains, unrivaled in the world for beauty, the Scottish Gathering and Festival will be held. Activities will centre around the Banff Springs Hotel that stands on the side of Sulphur

mountain commanding a "million dollar" view of the Bow Valley. The historic character of the Scot has been carried down from generation to generation in his music. The lyrics and ballads that are sung with never-fading enthusiasm will be heard to advantage at the coming festival.

The singers themselves will be good Scots of no mean ability. J. Campbell McInnes is a Highlander, now settled in Toronto, who is a recognized master in the interpretation of the old ballads. His rendering of "The Two Sisters of Binnorie" is one of the great things to be heard to advantage at the coming festival.

The concert stage under her maiden name of Ruth Thom and hails originally from North-east Scotland. Davidson, Thomson first saw the light in Perth and now directs the famous Grace Church Choir in Winnipeg, triumphant shield-winner at many Western Festivals. He himself has shone as a star at many Festivals in the United States as well as Canada. Ruth Matheson is a young contralto of Winnipeg who is winning recognition far outside her native city for her interpretation of Scottish songs. She comes of the stock of the Kildonan settlers. Norman Cameron is a

Hebridean who sings the Gaelic with a Gaelic tenor—none sweeter. And with him are Hebridean folk singers who sing with indescribable charm the exquisite songs of the Western Islands. The Canadian Pacific Calgary Male Voice Choir will give choral renderings of well-known Scottish songs.

With the dances—the Highland Fling—the Seann Truibhas—the Sword Dance—the Reel and with Marches goes of course the music of the bagpipes, not forgetting the pibroch, otherwise spelt as pibroch, of which not so many are masters. It is to the Highland Regiments that we owe the credit of keeping alive this stirring music, the sound of which stirs the blood as no other music can. By courtesy of the Canadian Minister of Militia, each of the seventeen Highland Regiments have the opportunity of being represented by a regimental pipe in an endeavor to secure a beautiful trophy offered by E. W. W. Betty, Chairman and President of the Canadian Pacific Railway, through whose interest and generosity the organization of this Highland Gathering at Banff has been made possible.

Scottish games and contests of all kinds will be a feature of the three-day Gathering.

Here and There

The apple crop this year will run to 1,850,000 barrels, according to W. H. Chase of Watkins, or a fifty percent increase over last year, while the crop of the Eastern States is reported only half that of last year.

The Department of Lands and Forests of the Province of Quebec have planted 1,600,000 trees this year—a record figure and nearly double that of last year. Next summer it is proposed to plant 8,000,000 trees.

Canada's net debt decreased by \$52,408,429 during the first four months of the fiscal year. It now stands at \$2,295,335,840. During the corresponding period of last fiscal year there was a decrease of \$41,251,655. Both revenues and expenditures show increases.

Tourist travel this season is in excess of previous years and is even more cosmopolitan in its derivations than formerly, according to G. E. B. Uscher, general passenger traffic manager of the Canadian Pacific Railway, back from a tour of inspection of the company's interests at Banff, Lake Louise and other favored tourist spots.

E. J. Chambers, President and General Manager of the Associated Fruit Growers of British Columbia, states that British Columbia apples are now being sent to South Africa, China, Sweden, Norway, Germany and Denmark, as well as Great Britain, the heaviest market. New York and Chicago are big consumers of two varieties, the McIntosh Red and Delicious, respectively.

A further party of 40 students representing many colleges in the British Isles arrived on the Canadian Pacific steamship Montrose and proceeded to the harvest field of Western Canada in the care of the C.P.R. Department of Colonization and Development. They will be placed upon farms in Saskatchewan for the duration of the harvest by the British Women's Immigration League.

Construction of the first commercial fish hatchery in Alberta will be started in September, announces R. T. Rodd, Dominion Fisheries Inspector. It will be located at the mouth of Canyon Creek on the south shore of Lesser Slave Lake. It is estimated that 100,000,000 whitefish will be propagated at the hatchery every year to maintain an undiminished supply of fish for the many companies operating in the lake.

So great is the interest which is being evidenced in the Scottish music festival organized as part of the Highland Gathering for Banff, September 3-5 that the Canadian Pacific Railway has arranged with the Alberta Government telephones to install the amplifiers of the public address system that were used at the Diamond Jubilee broadcast, so that the evening concerts will be heard not only in the ballroom of the Banff Springs Hotel, but also in the lounges and in the open air on the terrace.

Stocktaking And Investments For Young Men And Women On Alberta Farms

With the approach of Fall one's thoughts naturally turn to the winter months which will surely follow and the resulting easing off from work on farms. Now is an excellent time for every young man and young woman on the farms in Alberta to take stock and to decide how best to invest their spare cash and time during the coming winter.

Are you needed on the farm during the coming winter months? Whether your answer be in the affirmative or in the negative we have a proposition to make to you, the outline of an investment of a small amount of money and of your spare time. An investment which will give not only pleasure and profit during the coming winter, but a return that will endure throughout your entire lifetime.

If YOU are needed on the farm, the 3,700 books of the Library of the Olds School of Agriculture are at your disposal for the small yearly fee of \$2.00.

If YOU can be spared from the farm the course offered at the Olds School of Agriculture is worthy of your consideration and you will be interested to know that,—

1. The regular course consists of two sessions of five months each, opening this year on October 26th, and closing on March 29th, 1928.
2. The entrance requirement is the ability to read and to write.
3. The minimum age is sixteen years, for admittance to this School.
4. The School course is entirely free.
5. The New Dormitory being opened this Fall provides accommodation for 80 women and 100 men at \$30.00 per month. It is fully modern and is under the management of the School.

6. There is a gymnasium at the O. S. A. and plenty of social life is provided.

7. The courses taken up are Domestic Science for women and Agriculture for men. Both courses lay the foundation for more advanced study if the students wish to take it.

8. Anyone having grade XI standing may enter the second year of the course.

9. A Special Matriculation course is given for those having completed the two year's course, which is equivalent to the First Year of University.

The number of applications on file at present is more than at the same time in any previous year and more people than ever before are inquiring concerning the courses. We anticipate the largest attendance in the history of the School. Do you know of any better way of investing your money and time than in a winter spent at the O.S.A.?

If YOU are interested the Principal will be pleased to send you a Calendar and any further particulars respecting the School.

Wheat Pool Notes

The E. P. Ranch, owned by H. R. H. The Prince of Wales, has been signed to a Wheat Pool contract. The ranch contains a section of land and is located near High River. The Prince was a recent visitor at his ranch and while there instructed W. L. Carlyle, his farm manager, to have the acreage placed under a Pool contract.

The Alberta Wheat Pool is not operating a coarse grain pool this year. Blank coarse grain contracts have been sent out and if a sufficient acreage is signed a coarse grain pool will be operated next year.

By the time the bulk of the wheat is moving in Alberta this fall, the Alberta Wheat Pool will have 155 line elevators completed and in operation.

Women's Institute Decide To Present Bell To School

At a regular meeting of the Chinook Women's Institute held at the home of Mrs. B. Dobson on Wednesday afternoon it was decided to present a bell to the school.

Mrs. Jas. Rennie was appointed a delegate to attend the annual conference of the Women's Institute for Acadia Constituency to be held in Chinook on October 4.

The secretary was instructed to write for information regarding the District Builders Association.

Mrs. J. Rennie and Mrs. R. Smith were appointed a committee to arrange a program for the institute conference held here in October.

Mrs. R. Stewart resigned her position as secretary of the Institute, and Mrs. Todd was appointed in her place.

The next meeting of the Institute will be held at the home of Mrs. Lee on Wednesday, September 28, when details of matters relating to the Conference will be arranged.

We want to know you better

THE church has a definite service to perform. Its purpose is to help humanity. It wants your help in its efforts to help others. We want to know you better. Won't you come to church next Sunday, shake hands, and say you are ready to help in the greatest work on earth today—the work of bringing the world to Christ?

YOUNGSTOWN

Friday and Saturday, Sept. 16-17

"Firemen, Save My Child"

8.30 p.m. sharp.

Remember Beery and Hutton in "Behind the Front" and "We're in the Navy Now"—those two uproariously funny comedies? Remember how you spread the news like wildfire about the greatest comedy team in pictures. They're together again in "Firemen, Save My Child."
